T5572

Battery Powered Type Information

Package List

* 2 × Lighted Christmas Tree
* 2 × Stake
* 2 × Battery Box With Light String
* 24 × Decoration Balls(Random Delivery)
* 8 × Decoration Berries Branches
* 8 × Metal Cable Tie
* 1 × User Manual

Specifications

* Color: Multi-Color
* Material: PVC, Steel
* Per Tree Bead Quantity: 50Pcs
* Powered By: 3Pcs AA Batteries (Not Included)
* Timer: Auto On 6 Hours, Off 18Hours
* Waterproof Rating: IP44
* Per Bead Interval Length: 15cm/5.9in
* Lead Cable Length: 23cm/9.06in
* Total Cable Length: About 7.58m/298.8in/24.87ft
* Per Item Size(Assembled): 35×35×70cm/13.78×13.78×27.56in
* Per Item Weight: 0.6kg/1.32lbs

Highlights

* Featured with meticulously detailed foliage, pine branches, and comes with vibrant red berries and colorful decorative balls decor, allowing you to DIY the tree with your families for fun.
* The realistic appearance adds an artistic touch to any room, effortlessly creating a warm and festive holiday atmosphere.
* Enjoy distinct lighting modes, all powered by 50 warm LED beads. You can easily customize a steady glow or a dynamic twinkle light display to create a romantic mood for the season.
* Set it and forget it with the built-in auto timer. After being activated, the tree will glow beautifully for 6 hours and then shut off for 18, cycling daily to save energy.
* Simply insert 3 AA batteries (not included) and use the one-button control to cycle through your favorite lighting effects. No outlets, no messy cords—just hassle-free holiday charm.
* With IP44 waterproof, this tree is built to shine in any setting, indoors or out. Place it on porches, patios, gardens, planters, or lawns to spread festive cheer throughout your holiday celebrations.

Friendly Reminder: The Balls Ornaments with six colors including Gold, Silver, Red, Green, Blue, Pink, are shipped randomly. Please ensure you don't mind before purchasing.

Step 4: Insert the berries branches and hang the balls ornament, then fix with cable tie if needed

Step 5: Wrap the string lights around the branches

Step 6: Push the switch to "1" position to turn on Static Lighting, or "2" to Flash Lighting mode

Foreseeable Risk Warning for Nickel-Metal Hydride (Ni-MH) and Dry Cell Batteries

1. Risk of Overheating, Fire, and Rupture

Hazard: Overheating, leakage, or rupture may occur if batteries are overcharged, short-circuited, physically damaged, exposed to temperatures >60°C/140°F, or charged with incompatible chargers. May damage devices or ignite nearby materials.

Precaution: Avoid overcharging, short circuits, and physical damage. Ensure ventilation during charging. Do not charge damaged batteries.

2. Chemical Burns and Irritation

Hazard: Leaking batteries release corrosive electrolytes that can cause skin and eye burns. Vapors may irritate respiratory tract.

Precaution: Handle leaking batteries with gloves and goggles. If contacted, flush with water for 15 minutes and seek medical help.

3. Ingestion and Choking Hazard

Hazard: Small batteries pose ingestion and choking risks. If swallowed, can cause internal burns, obstruction, or be fatal.

Precaution: Keep away from children. Secure battery compartments requiring tools to open.

4. Sunlight Charging Considerations

Hazard: Leaving the panel in direct sunlight for extended periods can cause the battery to overheat, potentially leading to leakage, swelling, reduced lifespan, or damage to the string lights.

Precaution: For optimal charging and safety, position the panel in an area that receives indirect or partial sunlight. If the lights or battery housing becomes hot to the touch during charging, move the panel to a shaded or cooler location.

5. Environmental Hazard

Hazard: Contains heavy metals and corrosive materials. Improper disposal contaminates environment.

Precaution: Recycle only. Never dispose in household waste.

6. Legal Compliance

Note: Complies with applicable safety and environmental regulations including EU Battery Directive and US CPSIA.

Disposal

-- Store used batteries in cool, dry place
-- Cover terminals with non-conductive tape
-- Deliver to designated recycling points

Emergency Precautions

-- **Leakage:** Place in leak-proof container with gloves. Neutralize with diluted vinegar in ventilated area.
-- **Overheating:** Move to fireproof area to cool. Do not disassemble.
-- **Fire:** Use Class D extinguisher or sand. Do not use water.
-- **Ingestion:** Seek immediate medical attention.
