UltraHD Wood Top Maintenance:

Although great care is taken to hand select consistent wood top color and grain for UltraHD products, there can and will be natural variations in color and graining between finished products. These variations contribute to the beauty of using a natural material as a workbench and are considered standard quality. Variations of color within these standards and minor scratches in the clear coat finish will not be a reason for replacement. If the wood top is received with excessive damage or splitting, Seville Classics will guarantee replacement of the wood top.

Restore Shallow Scratches or Chips

If the wood top becomes scratched and chipped over time or during assembly, a Polyurethane finish can be applied to help restore the wood's natural texture, as well as protect the surface from future damage.

Applying a Polyurethane Coating

Please follow the manufacturer's instruction on the product for application.
