Get in touch with your wild side with this exclusive collection by Angela Harris for TileBar. Wilder fuses art with nature, and porcelain with red body ceramic; the unique collection is made in Spain. Inspired by tropical and botanical patterns found in nature, Harris designed Wilder so its 8-by-8-inch tiles create a mural-like effect when installed together. Bits of shine enhance the matte finish in this collection, which is recommended for wall installations.

A unique glaze transforms Wilder's classic porcelain tile with light and dimension. Along with the appearance of brushstrokes and imperfectly defined lines, the artful effect lends a distinctive handmade look to the tiles in this collection. Every tile is thoughtfully designed by Angela Harris and made in Spain to our specifications.
