

WARNING

This portable lamp has a polarized plug (one blade is wider than the other) as a safety feature to reduce the risk of electric shock. this plug will fit in a polarized outlet only one way. if the plug does not fit fully in the outlet, reverse the plug, if it still does not fit, contact a qualified electrician. Never use with an extension cord unless the plug can be fully inserted. do not attempt to defeat this safety feature.

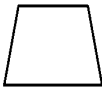

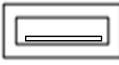

CARE AND MAINTENANCE

Unplug lamps before using any cleaning solutions. Dust shades with a feather duster or with an appropriate vacuum-brush attachment. Wipe with a soft, dry cloth and clean lamp bases with the methods appropriate to the material. Avoid the use of chemicals and household cleaners as they may damage the finish.

 The diagram shows the lamp's components in an exploded view. At the bottom is the lamp base (A), a tall, slender, vase-like structure with a small circular base. Above the base is the socket (D), which includes a mounting bracket (B) and a saddle (C). A harp (E) is shown above the socket, and a light bulb (H) is positioned to be inserted into the socket. Above the harp is the lamp shade (F), a trapezoidal shape. At the very top is the finial (G), a small decorative cap. A power cord is shown extending from the base of the lamp.	 The diagram shows the lamp fully assembled. The lamp base (A) is at the bottom, with the socket (D) and harp (E) attached. The light bulb (H) is inserted into the socket, and the lamp shade (F) is mounted on the harp. The finial (G) is at the top. A power cord is shown extending from the base of the lamp.
Step 1:Insert the Harp (E) into the Saddle (C),Put the Shade(F) on the Harp(E),then tighten the Finial (G)into the Harp (E),Insert the bulb(H) into the socket(D).	Step2:Put the light on a level surface to check if everything is stable.
