

Installation Steps:

Thank you for using our products. Please read the operating instructions before installation. Please keep this instruction as a reference. Disconnect the power supply before installing this product. Installation by a professional electrician is recommended.

1. Pass the light head wire through the hole in the center of the disc, adjust the required length, and then use a screwdriver to fix the wire from the side.
2. Secure the pendant plate in the reserved mounting box.
3. Connect the (L) wire to the fire wire and the (N) wire to the zero wire with wire caps and wrap tightly with insulating tape. Connect the light's ground wire to the junction box's ground wire. If the house does not have a ground wire, connect it to the green screw on the wall plate. (Screw label: GND).
4. Secure the light to the wall plate with the round nut.
5. Attach the bulb to the lampshade, ensuring good contact.

Attention:

1. The input power of the lamp is AC 120V 50Hz.
2. Any behavior that violates residential fire protection regulations is prohibited.
3. Under no circumstances should the lamps be covered with heat insulation pads or wooden materials.
4. Before maintenance, make sure that the power supply of the lamp has been cut off and the light source has cooled down. Before powering on, make sure that the light source and the lamp holder are connected correctly.
5. Please wipe with a towel or flannel, and clean the lamp body with a non-corrosive detergent. Do not scrub directly, wipe with water or a damp cloth.
6. If you have any questions about this manual, please consult a qualified lighting installation engineer.
