Dry Wall

Wooden Wall

To install:

- 1) LOCATING THE STUDS:** Use a stud finder to locate the vertical wooden studs within your wall located behind the final position of the furniture item. Mark the stud locations with a light pencil-mark.
- 2) MOUNTING THE WALL-SIDE BRACKET:** Position the wall-side bracket along the selected stud mark so that it will be adjacent the furniture-side bracket when the furniture item is moved to its final position. The wall-side bracket should be about ONE inch lower than the furniture-side bracket (See Figure 3). Use the TWO long screws to secure the wall-side bracket to the wall. Remember to position the wall-side bracket vertically so that both screws will engage the selected wall stud (See Figure 1).
- 3) ATTACHING THE STRAP:** Once the wall brackets are securely attached, move the furniture to its final desired position and thread the strap through the openings of each bracket and also through the ratcheting "buckle". Tighten the strap until several "clicks" are heard. The furniture item is now securely tethered to the wall.
