

## ***Installation Instruction***

**Please turn off power and read this instruction before installation.  
The installation must be handled by a qualified electrician with license.  
Please also turn off power before changing the bulb and cleaning the fixture.**

- A. Lock the glass plate (16) onto the lamp body (12) with a flat nut (17).
- B. Thread the long straight tube (11) through the lamp body (12) and lock it tightly with the short straight tube (13).
- C. Connect the wire (6) of the lamp body to the external power cord using a wiring cap (1), and connect the ground wire (7) with a green grounding screw.
- D. Fix the hanging plate (2) to the junction box with screws (4).
- E. Screw the ball nut(10) to fix the canopy(8).
- C. Install the bulb(not included).

### **Note:**

The glass is handmade, there may be a slight difference between each piece. If there is an uneven arrangement of holes or difficulty in screwing in bolts during installation (Step A), please try to swap the glass pieces or change the position of the corresponding screws on the glass pieces.

*(For example, there are 4 pieces of glass for each light fixture, the alignment can be changed, if the first piece of glass does not fit into the hole, other pieces of glass can be used and then the first piece of glass can be used for the other positions.*

*Until all the glass can be completely mounted on the fixture.)*
