

# INSTALLATION INSTRUCTIONS

## READ AND SAVE THESE INSTRUCTIONS

**WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**

**AVERTISSEMENT! COUPER LE COURANT AU NIVEAU DES FUSIBLES OU DU DISJONCTEUR.**

### PREPARATION (Fig.1)

1. Shut of power at the fuse box or circuit breaker box and remove the old fixture including the mounting hardware.
2. Carefully unpack your new fixture and lay out all the parts in a clean area. Take care not to misplace any small parts necessary for installation.
3. Connect cable and fixture body together by threading screws (H) on end of cable into coupling (G) on fixture body and adjust cable to keep fixture leveled.
4. Secure rod (E) onto all thread (F), screw canopy (D) onto rod (E). Carefully feed wires through each part as you assemble.
5. Attach mounting plate (A) to junction box (Not included) with mounting screws (B) (Size: #8-32N\*L0.5"). The side of the mounting plate (A) marked "GND" and two convex points must face out.

### CONNECTING THE WIRES (Fig. 2)

6. Connect the electrical wires as shown in fig 2, making sure that all wire connectors are secured. If your junction box has a ground wire (green or bare copper), connect the fixture's ground wire to it. Otherwise, connect the fixture's ground wire directly to the mounting plate (A) using the green screw provided.
7. Tuck wire connectors neatly into the junction box.

### COMPLETING THE INSTALLATION (Fig. 1)

8. Place canopy (D) over mounting plate (A) and secure with screws (C).
9. Place candle covers (J) over sockets (I).
10. Install (6) six candelabra base bulbs (K) up to 60 watts each or CFL or LED equivalent (not included) in accordance with the fixture specification—**DO NOT EXCEED THE MAXIMUM WATTAGE RATING! (NE PAS DEPASSER LA PUISSANCE NOMINALE MAXIMALE!)**.

Your installation is now complete. Return power to the junction box and test the fixture.

**Note: Illustration (Fig. 1) on this manual is for installation purposes only. It may or may not be identical to the fixture purchased.**
