Reflected Memory 2

D50S990-57

Reflected Memory deftly captures an abstracted view of light bouncing off a body of water. Heavy texturing occurs organically through the natural movement of the water and the refracted light. A simple two-tone color scheme in river-rock grey and alabaster add dimension.

A tranquil display of depth and motion, Reflected Memory uses the movement of water to encourage a moment of contemplation in the viewer.

► Frame Width: 0.625 in

W 52 x D 2 $\frac{3}{4}$ x H 39 inches
