

**Now let's take a video of the installation of this fish tank.**

Check if the accessories are complete.

The first step is to tighten the two pipes.

Step two: Install the threaded pipe in the middle of the white pipe, push it in, and press it tightly.

插进去要按一下按紧

Plug it in and press it tightly.

Step three, place the blue tube over the white pipe fitting, and then cover the blue lid.

Step 4: Plug in the white tube tightly and press it once.

Place the water pump on the water pump pipe and tighten the clamp.

Black pipe inserted above the dry and wet separation box. The cabinet is installed with a diagram below.

Filtering material is placed in position, the bacteria house is lowered to the lower layer, and the upper layer is filled with cotton.

Remove the white foam on the fluorescent tube.

Tighten the four columns of the bar.

直接放上去就可以了

Just put it on.

Simply place  
the bar glass directly on it

After installing the sample chart.
