## Installation instructions for Metal mount

### Steps to install the mount:

Step 1: Take the mount to check the lighting location on the ceiling, and mark the screw hole with a marking pen.

Step 2: Drill holes at marked locations with electric drills, and then use a hammer to drive the expansion bolts into the holes.

Step 3: Fix the mount into the expansion bolts with tapping screws [Each tapping screw should be set with one flat washer]

Step 4: Assemble the lighting frame with screw rods, test the electricity on the ground, make sure the lamp works normally.

Step 5: Connect the driver of the lamp with the power cord of the ceiling, and then fix the lamp to the metal mount with screws.
