Expansion on the Mind 1

D2515S50292-4089

Expansion on the Mind 1 is a large-scale work on canvas emblematic of second-generation abstract expressionism that features a bold gestural approach with sweeping brushstrokes. This work favors an all-over composition and invites the viewer's eye to be drawn in multiple directions. This lack of a singular focal point amplifies the feeling of boundlessness, in line with the painting's title. In keeping with the style of painting, this work relies on flatness to emphasize the two-dimensional nature of the artwork. This technique can involve a disregard for traditional techniques such as perspective, shading, and realism.

The color palette in alabaster, ochre, olive green, cerulean, maze, and dove grey reflects the complexities and fluidity of this accomplished work. Expertly blending light, airy colors with rich tones in this emotional work of art, Expansion on the Mind 1 is a beautiful addition to the exclusive ART by TA Collection.
