

Solar Outdoor Lights

Model:SZ-22002

Specification:

Solar Panel: 2V/0.6W

Battery: NI-MH AA1000mAh 1.2V

Bulb Type: LED Bulb

Color Temperature: 2700K/6500K

Material: PP+ABS+PS

Waterproof Class: IP65

Package:

Light Holders

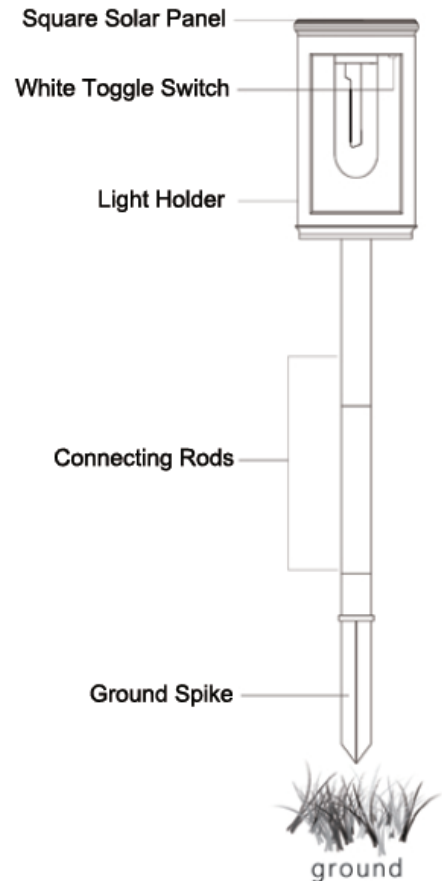

Connecting Rods

Ground Spikes

User Manual

Installation:

1. Take out the square solar panel on the lamp holder.
2. Toggle the switch on the back of the solar panel to "ON".
3. Put the square solar panel back.
4. Connect the two connecting rods.
5. Connect the connecting rod to the ground spike.
6. Connect the light holder to the light rod.
7. Install the light in a place where it can get direct sunlight.

Note:

1. Please make sure to toggle the switch to "ON" before using it.
2. Do not install solar panels in areas that are shaded or under the lights.
3. Please ensure that the solar panel is charged in direct sunlight for at least 8 hours during the initial charge.
4. In cloudy weather or winter, the charging time may be longer, and the working time may be shorter. It's a normal phenomenon of solar lights, not a quality issue.
5. If the ground is too hard, do not forcefully twist or hammer it. Try softening the ground with water and then insert the light into the ground.

Warning:

1. Do not dispose of the product in a fire. Heat will build up and may cause an explosion.
2. Do not disassemble or retrofit the product.
3. Do not soak the product in water.
