L-SHAPED DOWN SECTIONAL SOFA
L-SHAPED DOWN SECTIONAL SOFA
FOR LIVING ROOM

INSTRUCTION
MANUAL

PRODUCT OVERVIEW:

This product features premium high-density sponge as its core filling material, paired with high-quality fabric.

It delivers outstanding support and resilience while meeting the current industry's stringent standards for health and environmental sustainability.

With advanced compression technology, the product is compactly packaged in a vacuum state for easy single-person handling. It is especially suitable for confined spaces like elevators and staircases with tight turns.

Sink into the soft, non-sagging seat cushion that stays supportive for years, and lean back against the ergonomic backrest-engineered to keep its perfect shape even with daily use.

Our product is expertly crafted to blend plush comfort with everyday functionality!

USAGE
SCENARIO :

Home living room relaxation scene	Office areas such as offices and reception areas
Bedtime relaxation scene	Business and leisure facilities
Temporary break emergency scenario	
Balcony leisure scene	

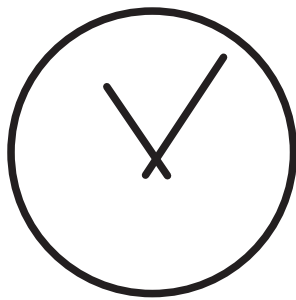

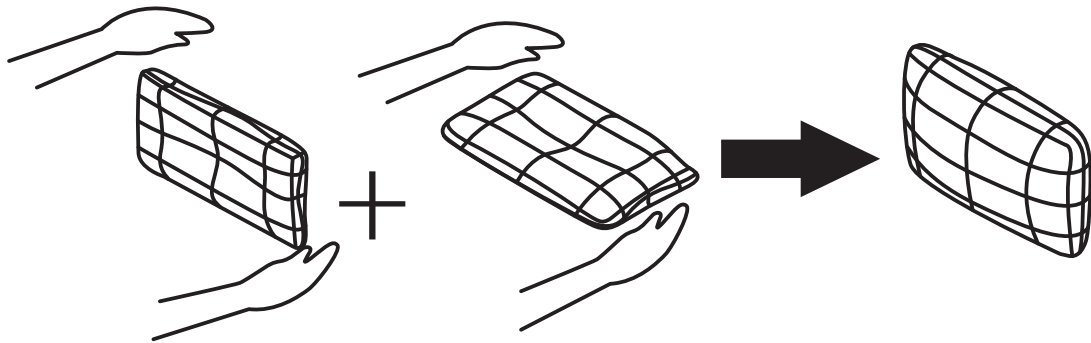

INAPPROPRIATE
USAGE SCENARIO :

Moist environments can cause mold to develop on frames and bacteria to grow on fabrics.

Environments with high dust concentrations and corrosive gases may easily contaminate fabrics and degrade materials.

Unsupervised scenarios where children climb or play alone pose safety hazards.

INSTRUCTION MANUAL

72h

it might takes up to 72 hours.

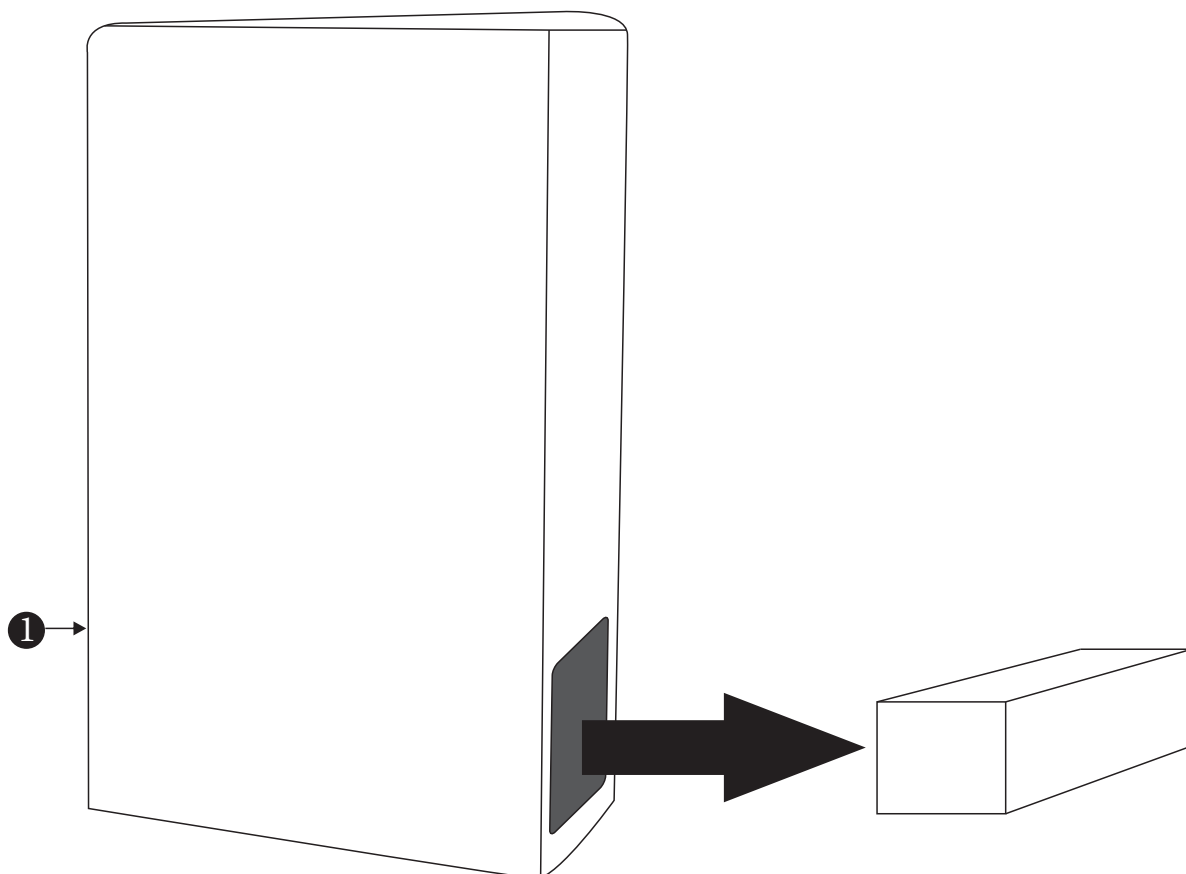

NOTE:

- 1.due to differences of lights,the actual color of the materials might be slightly different from the pictures.
- 2.due to package compression for better shipment,the fabric may have wrinkles.
- 3.please take all packages out and pat every part to make it rebound better and fluffy,so that it can restore to picture-like status.
- 4.please keep children away form the plastic bags.
- 5.repeatedly tap the sides and front and back to make it rebound better and fluffy.
- 6.knead your cushion like giving your cushion a massage while allowing the air to flow through the foam.

INSTRUCTION MANUAL

INSTALLATION AND DEPLOYMENT GUIDE :

Select a flat, dry surface free of sharp objects for operation to avoid scratching the sofa fabric.

Ensure the installation area has sufficient space (at least 40in larger than the unfolded sofa) for easy operation.

No additional tools required (The screw pack includes a dedicated letter opener), It can be installed by one person, but two people working together is recommended for easier deployment.

UNFOLD THE STEPS:

Unpacking:

Use scissors or a utility knife to gently cut along the packaging seal (note that the blade should face outward to avoid scratching the sofa), then take out the compressed sofa main body and accessories.

Unpacking:

Remove the compressed film from the surface of the main body of the sofa (some products are packaged in vacuum bags, so you need to open the vacuum valve to release air first), slowly unfold the sofa, and place it on a flat ground.

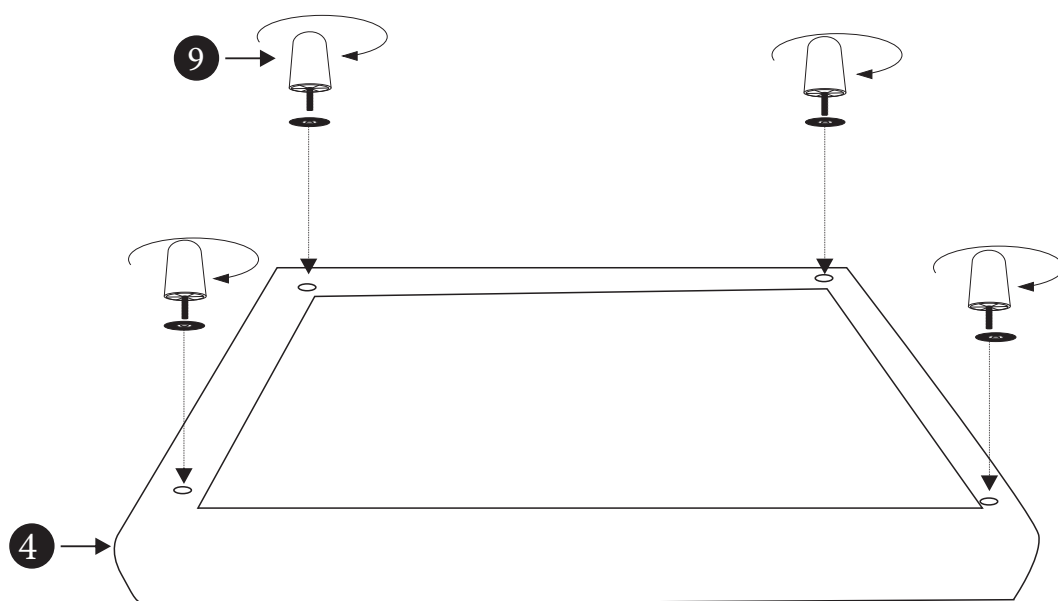

Rebound waiting:

After being unfolded, the sofa needs to stand still for [24-72 hours] to allow the sponge to fully rebound to a plump shape (the rebound time is affected by the ambient temperature and may be prolonged in a low-temperature environment).

Reset check:

If there are other accessories, please check that they are installed firmly without shaking. The surface of the sofa should be flat and rebound normally, and then the installation can be completed.

CORRECT USAGE:

When using, please avoid scratching the fabric with sharp objects (such as knives, nails, metal accessories, etc.).

Please do not jump or step on the sofa for a long time to avoid deformation of the frame or damage to the sponge.

Avoid prolonged exposure of the sofa to direct sunlight or placing it near high-temperature heat sources (such as radiators, air conditioning vents) to prevent the fabric from fading, aging, and the sponge from deforming.

CLEANING AND MAINTENANCE :

The cleaning methods for different fabrics may vary; please refer to the fabric label instructions for details. If you encounter stubborn stains, it is recommended to contact professional cleaners for handling to avoid damaging the fabric due to self-cleaning.

Cleaning sofa crevices: Cotton swabs or small brushes can be used to clean dust and debris in the crevices.

When not in use for a long time, the sofa needs to be cleaned, completely dried, then covered with a dust cover and placed in a dry and well-ventilated area, avoiding extrusion.
