

# USER'S MANUAL

## METAL STORAGE SHED

Please read this manual carefully before assembly and keep it properly.

# BEFORE YOU START

## Assembly Instructions

Before starting the assembly, verify local building codes for footing, location, and other requirements. Review all instructions before starting, and carefully follow the step sequence during the assembly.

## Parts and Parts List

Ensure you have all the necessary parts. Organize the contents of the carton by part number referring to the parts list. The first few steps demonstrate how to assemble related parts into larger sub-assemblies for later use. Familiarize yourself with the included hardware and fasteners to streamline the assembly process. Please note that extra fasteners are included for your convenience.

## Check the Weather

Ensure the weather the day chosen for installing the shed is fine. Avoid assembling on windy days, and exercise caution on wet or muddy ground.

## Teamwork

Whenever possible, engage two or more individuals on the assembly. One person can position parts or panels while the other handles fasteners and tools.

## Tools and Materials

Here are some essential tools and materials for the assembly. Determine the anchoring method and foundation type you intend to use to make a comprehensive list of required materials.

## Required Tools

# CARE & MAINTENANCE

---

## **Finish**

For a long-lasting finish, regularly clean and wax the exterior surface. Address scratches promptly by cleaning the area with a wire brush, washing it, and applying touch-up paint according to the manufacturer's recommendation.

## **Roof**

Keep the roof clear of leaves and snow with a long-handled, soft-bristled broom. Excessive snow on the roof can damage the shed. In snowy areas, Roof Strengthening Kits are available for most Arrow Buildings, providing added protection against heavy snow accumulation.

## **Doors**

Ensure the door tracks are free of dirt and debris. Lubricate the door track annually with furniture polish or silicone spray. Keep doors closed and locked to prevent wind damage.

## **Fasteners**

Use all supplied washers for protection against weather infiltration and prevention of screw scratches to the metal. Regularly inspect the shed for loose screws, bolts, nuts, etc. and re-tighten them as necessary.

## **Moisture**

Reduce condensation by placing a plastic sheet (vapor barrier) under the entire floor area.

## **Other Tips...**

Wash off inked part numbers on coated panels with soap and water.

Use silicone caulking for watertight seals throughout the shed.

Avoid storing swimming pool chemicals in the shed.

Store combustibles and corrosives in airtight approved containers.

## WARNING

1. Carefully read the instructions and strictly follow them during assembly and use.
2. Double-check to ensure that all parts in the package are intact.
3. Use an electric screwdriver for secure assembly.
4. Be careful when handling the metal parts of the shed as they may have sharp edges. Wear appropriate protective equipment such as gloves during assembly to avoid accidental cuts or abrasions.
5. Some parts of the shed can be heavy. If necessary, use aids to prevent injury.
6. Ensure that the shed is securely anchored to the ground or a stable surface according to the assembly instructions. Failure to do so may result in instability or overturning, causing personal injury or property damage.
7. When using the lockable door, keep the key out of reach of children and pets to prevent accidental locking or entrapment.
8. Although the shed is weatherproof, extreme weather conditions such as high winds or heavy snow may affect its stability. Please inspect the shed regularly and reinforce it as necessary to withstand severe weather conditions.
9. Inspect the shed regularly for signs of wear, damage or corrosion. Replace any worn or damaged parts immediately to maintain safety and structural integrity.
10. Reduce the risk of accidents by placing the shed in a designated area away from high-traffic areas or areas where children often play.
11. Properly dispose of packaging materials to prevent tripping or accidental ingestion by children or pets.

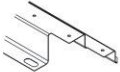

This product requires two individuals for installation, taking approximately 2-3 hours.

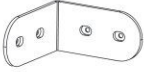

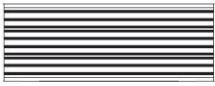

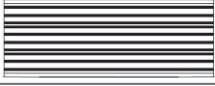

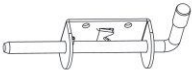

Wear gloves to prevent injuries.

Use an electric screwdriver for secure assembly.
