DURING PRODUCT OPERATION AND MAINTENANCE.**

WARNING AND SAFETY INSTRUCTIONS

Before assembling your LED Lighted Mirror fixture, please make sure that you carefully read through this instruction sheet, refer back to them during installation to ensure your product is fitted safely and correctly. Keep these instructions for future use.

WARNING Risk of Fire and Electric Shock

- All fittings must be installed in accordance with current IEE wiring regulations. If in doubt, consult a qualified electrician.
- Switch off the electrical supply at the main circuit board BEFORE installation and maintenance.
- Suitable for indoor use only. This product should be positioned well away from curtains and fabrics. Never cover the mirror.
- Regularly check the cord, the transformer and all other parts for damage, if any part is damaged the product should not be used.

INSTALLATION SAFETY

- Inspect the product immediately upon receipt for the transit damage or missing parts. Handle the product with care and protect against knocks to all sides and edges of the glass.
- Ensure there are no hidden pipes or cables in the wall before drilling.
- Wear suitable eye protection when drilling. Take care if drilling on tiled surfaces in case the drill slips.

CAUTION

The light source of this product is non-changeable light diodes (LED). Do not disassemble the product, as the light diodes can cause damage to the eyes.

NOTE: The important safeguards and instructions that appear in this manual are not meant to cover all possible conditions and situations that may occur. It must be understood that common sense, caution and care are factors that can't be built into any product. These factors must be supplied by the person(s) caring for and operating the fixture. Do not install this fixture in hazardous locations.

LED Mirror Power Source FAQ

Scenario 1 (Direct Wired)

This is the most common way to connect the mirror. The LED light & anti fog pad are both controlled by the built-in touch switch on the mirror.

*The LED light is dimmable.

Internal Power Flow Diagram

Scenario 2 (Wall Switch)

By doing so, the mirror is now bridged to the wall switch. In order to turn on the mirror, the wall switch needs to be on. The touch switch can be used to turn on the LED mirror and anti-fog pad. The mirror shuts down once the wallswitch is flipped to OFF.

Scenario 3 (Wall Dimmer Switch – Not Accepted)

This is a scenario that is not acceptable.

There is no work around for our mirror.
Do not try this way as it will damage the LED driver.

DEAR CUSTOMER,

Thank you very much for using our products. We believe that you will like the 100% quality products that CASAINC bring to you. We will grateful if you could leave us a positive feedback.

The satisfaction of customer is our goal, if there is anything we can do to improve your shopping experience, please contact us!

Thanks again for your purchase sincerely, welcome to your next visit.
