

Manual - S

QC
PASSED

Please fully charge the light before using it for the first time.

Functional Instructions

■ Button (⏻)

Press 1st time: Turn on the light

Press 2nd time: Dark & motion sensing mode

(The Dark & motion sensing mode will be entered after the light flashes two times.)

Press 3rd time: Turn off the light

■ Button (⚙)

Short press: Switch light colors

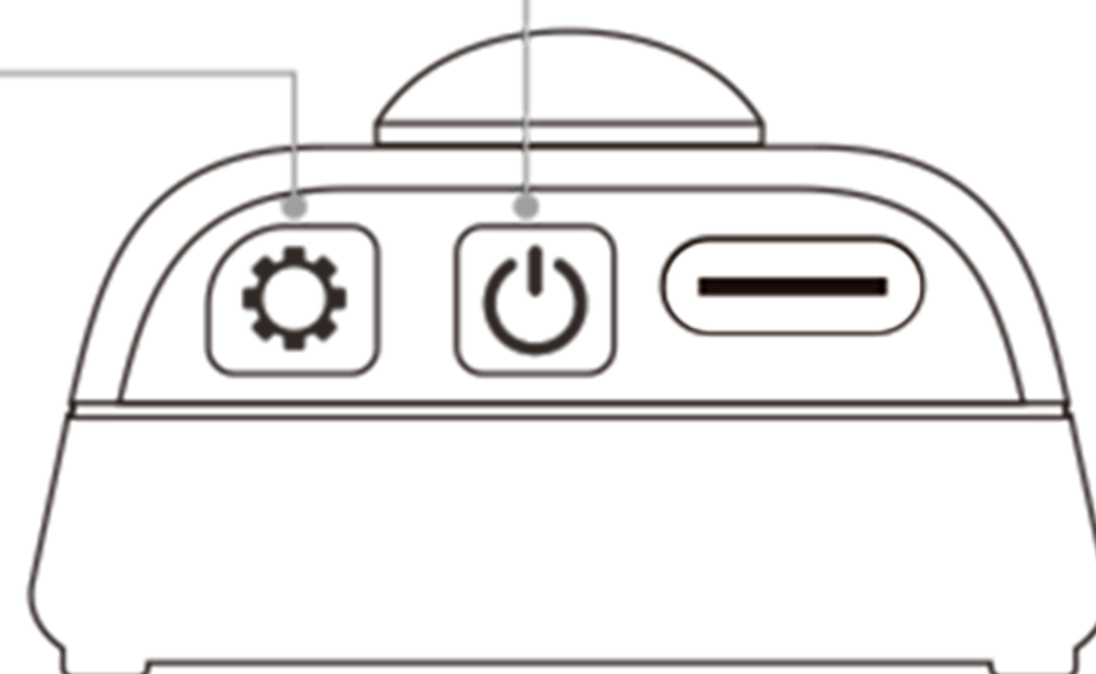

Long press: Adjust the brightness

■ Charging port: Type-C

Charging input: 5V==1A

■ Charging indication

Red light on: charging / Green light on: fully charged

Note

❓ You may encounter: Just got the light, but I can't turn it on?

💡 The battery has entered a sleep state and temporarily stopped power supply. It will resume normal operation after charging.

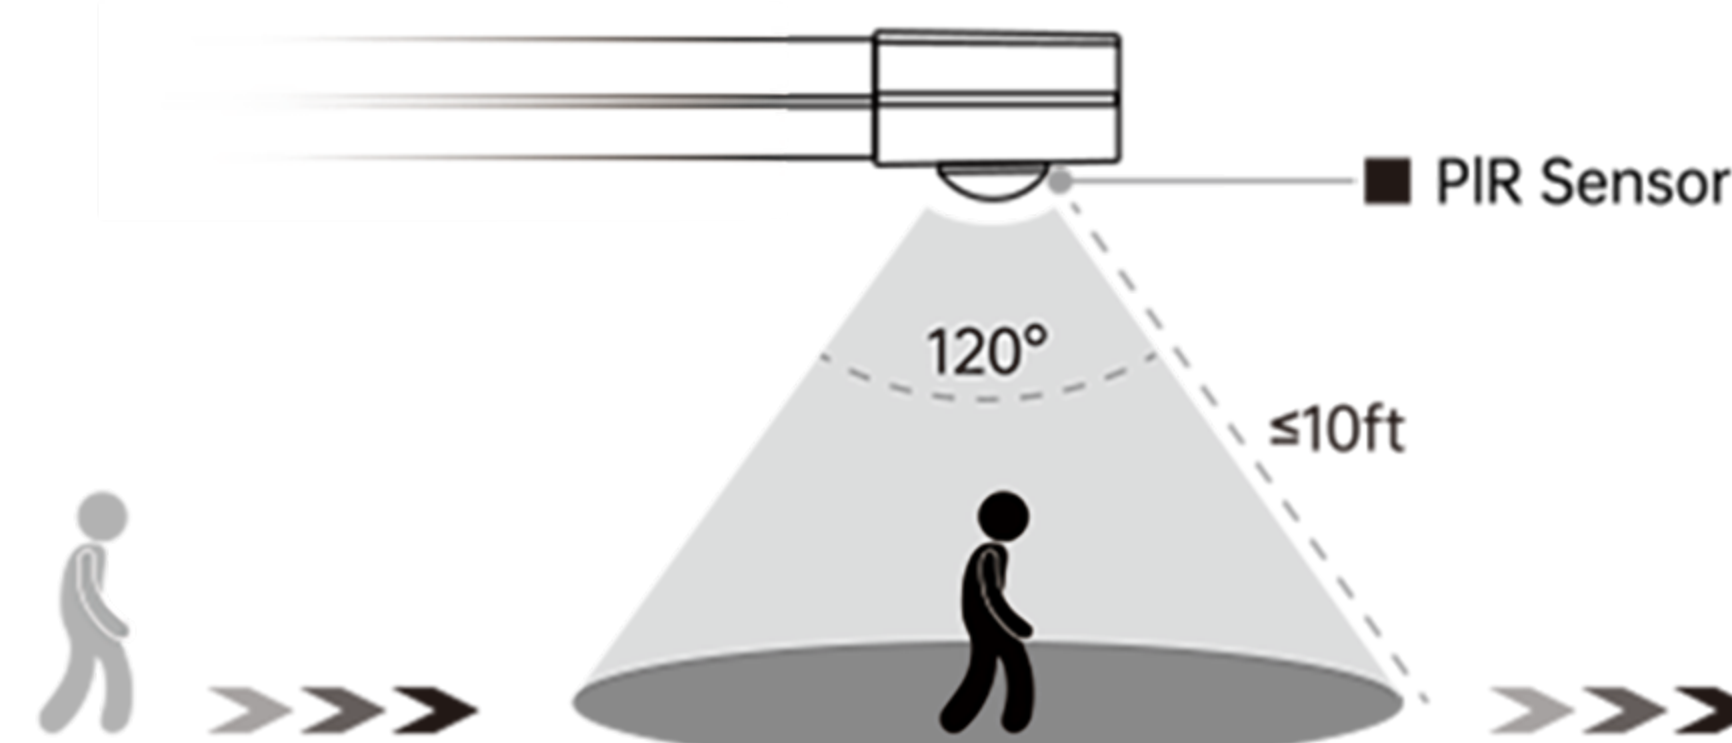

The light dims as the battery drains, please recharge when it's low.

Please test the dark & motion sensing mode in a dark environment.

Sensing mode instructions

The light won't turn on if no one is within the sensing range.

When you enter the sensing range, the light will automatically turn on.

The light will automatically turn off about 25 seconds after you're out of the sensing range.

1. In dark & motion sensing mode, the light will automatically turn on when the following two conditions are met:

☑ **Dark environment**

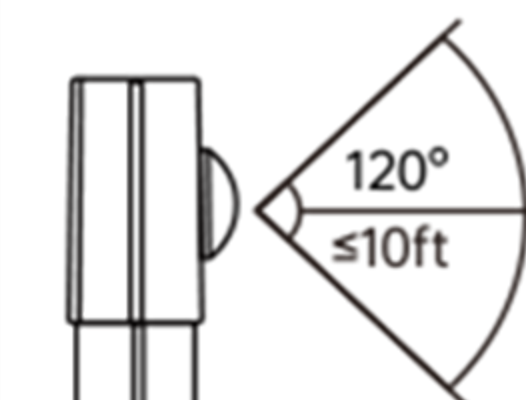

☑ **Motion is detected**

(In bright environment, the light remains off to conserve battery power even when motion is detected.)

2. The light remains on continuously as long as motion is detected within the sensing range.

Sensing range instructions

■ Sensing range: The PIR sensor covers a 120° area within 10 feet.

1. Obstacles block sensing, including transparent ones.

2. Direction impacts sensing range.

Forward: maximum

Lateral: decrease

Backward: not sensing

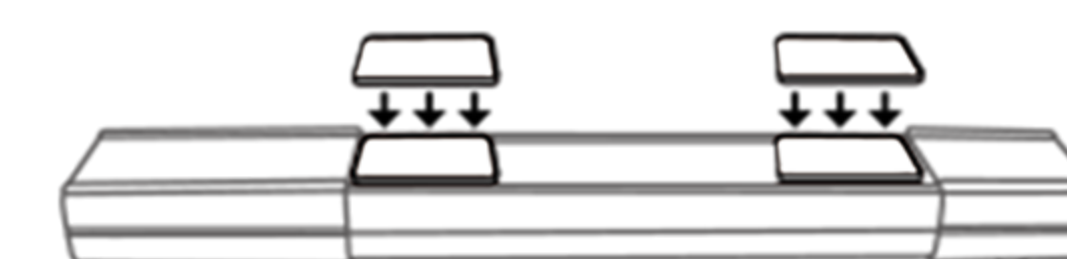

3. Note: Installing the light here will significantly reduce the sensing range:

☒ A cabinet full of stuff

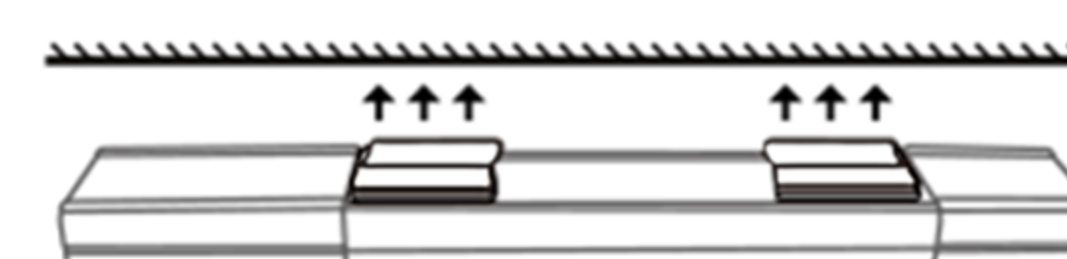

☒ Deep inside the cabinet

☒ Too close to the ground

About the installation

1. Place the metal blocks.

2. Tear off the paper and stick it. (Press firmly and hold for a few seconds for better sticking.)

3. Installation is completed. (The light magnetically connect to the metal block - easy to remove or fixed as needed.)

Precautions

1. Please fully charge the light before using it for the first time.
2. Do not use charging devices with output voltage greater than 5V==1A to charge the light.
3. Please use a certified charging adapter to charge the light.
4. Do not use while charging. Keep away from fire. Do not use it in humid or hot environments.
5. Non-professionals must not attempt repairs.
