**POSTAL PRODUCTS
UNLIMITED, INC.™**

Congratulations on your purchase of a Colonial/1812/1092/Estate mailbox system.

Upon receiving your order, please inspect your merchandise for potential freight damage or missing parts. Using the component pages in this manual, double check to ensure that you have everything that you are supposed to have. If you are missing anything, please call our customer service department immediately at 800-229-4500.

This user manual cover installation and assembly instructions for the following proprietary product lines of Postal Products Unlimited.

- ***1812 Series***
- ***Colonial Series***
- ***1092 Series***
- ***Estate Series***

The 1812 & 1092 mailboxes, as well as the Washington style posts are made from rotationally molded plastic with UV inhibitors to prevent color fading.

Each newspaper tube and all bracketing is made from galvanized steel that is powder coated to a smooth, semi-gloss finish.

Hardware included, such as the lock nuts, bolts, and threaded inserts are made of stainless steel or aluminum, treated with a rust resistant finish.

For full size drawings, photos, and detailed product information, visit our website at:

www.mailproducts.com

We also carry United States Postal Service approved 4-C mailboxes and the new F-Spec C.B.U., as well as a full selection of residential and commercial mailboxes. For custom or quantity quotations, or to reach our skilled customer service team please call us at: 800-229-4500.

In-Ground Installation of Washington/Estate/Senator Post

Items Needed: (not included)

- (2-3) 20 lb. bags of ready mix concrete per post
- (1) Strap Level (can be purchased at any hardware store for approximately 2-3 dollars)
- (1) Shovel (spade) or auger
- (1) Sturdy stick to stir concrete
- (*) Approximately (1) gallon of water per 20 lb. bag of ready mix concrete (see concrete mfg. instructions)

Before Installation:

*** WARNING: Check with local utility companies for location of underground utility lines (electrical, gas, water, etc).

*** CHECK with your local postal authority for location and placement of mailbox posts.

Installation:

(STEP 1) Dig your hole approximately 13"W x 30"D, being certain to dig below frost line (frost line depth may vary with geographic soil conditions). Insert Washington post into hole periodically to test the depth in relation to the base of the post.

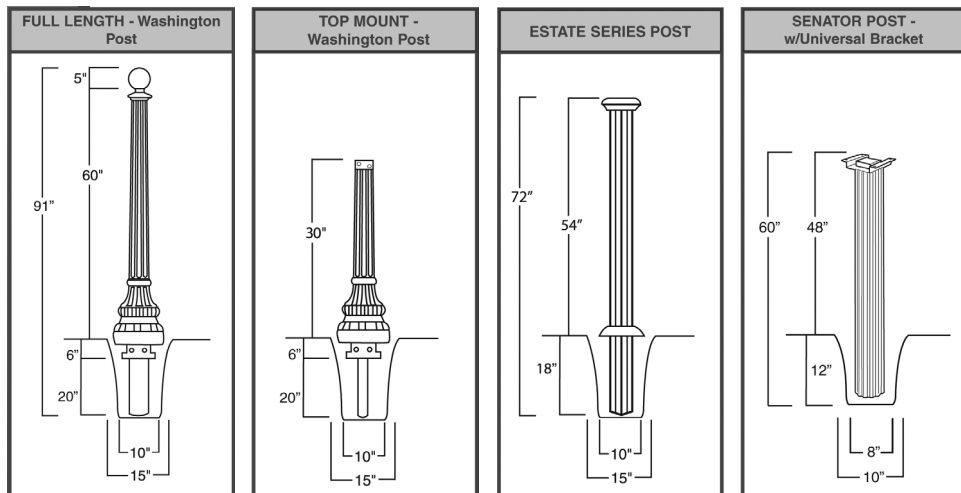

(STEP 2) Loosen wing nut. Remove bolt and wing nut from bottom. Remove Inner steel post and flip over. Insert back into outer steel post. Reattach bolt and tighten wing nut to keep together.

(STEP 3) Pour concrete into hole and insert post. Push the post into the concrete so plastic base is submerged 1/2" - 1 inch.

(STEP 4) With Washington/Estate/Senator Post placed inside hole, use strap lee to verify post is plumb and wait for concrete to set per concrete manufacturing instructions.

(STEP 5) Wipe excess concrete away from post areas with water and a towel/rag.

***** This installation procedure pertains to all models of Washington, Estate, and Senator posts that require direct burial installation.**

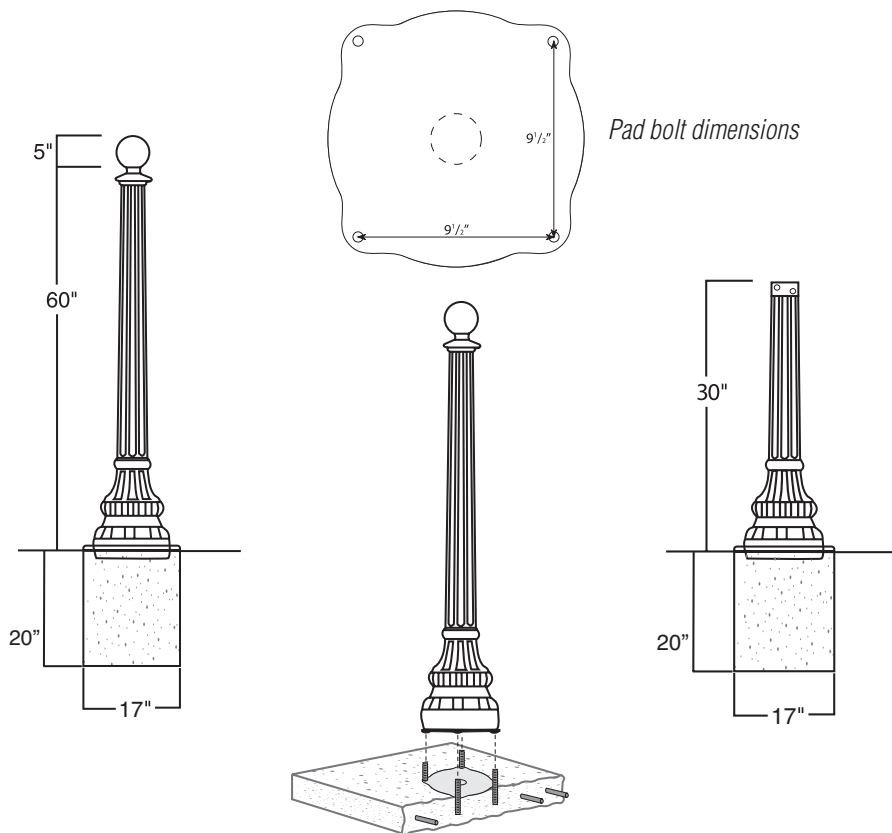

Optional Surface Mount Upgrade For Washington Post

Before Any Installation

- **WARNING:** Check with local utility companies and Diggers Hotline for location of underground utility lines (electrical, gas, water, etc.)
- CHECK with your local postal authority for location and placement of mailbox posts.
- Requires: Customer supplied mounting bolts
Customer is responsible for concrete pad

The surface mount option was designed with the property developer in mind. With this upgrade, the concrete pads can be poured by the development's mason at the time the driveways and patios are being poured. When the concrete pad is poured, (4) bolts are placed into the wet concrete with threads exposed (see bolt placement dimensions below). When you are ready to install your mailbox, simply place the fully assembled post over the (4) bolt threads, and spin on the lock Nuts. Your post installation is complete.

Applicable to: Weston, Augusta, Cape Charles, Beaumont, Donan, Alderbury, Nevern

Assembly Instructions For Single Front Mount, Full Post Option

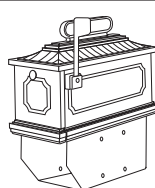

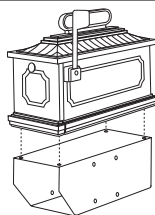

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel Nuts & bolts)

1

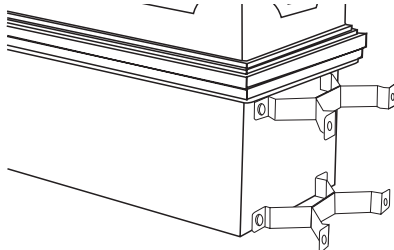

Attach the mailbox to the newspaper tube using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box. If your mailbox style does not use newspaper tubes, skip ahead to the next step.

2

Fasten the 1812 brackets (X in shape) to the back of the newspaper tube utilizing the (4) 1/2" x 1/4-20 bolts & (4) nylock Nuts. Use the (4) existing predrilled holes. When finished, these brackets will wrap half way around the post. If your mailbox option does not use a newspaper tube, the 1812 brackets (X in shape) will attach with (4) predrilled holes on the back of the 1812 mailbox.

(The Cape Charles option does not use a newspaper tube).

3

3-A.) Attach (1) back bracket to one side of each of the (2) 1812 (X shape) brackets using (2) 1-1/2" x 1/4 - 20 bolts and (2) nylock Nuts.

3-B.) Bring the entire mailbox unit to the front of the post and fasten the other side of the brackets around the post and to each of the 1812 brackets using the remaining (2) 1-1/2" x 1/4-20 bolts and (2) nylock Nuts.

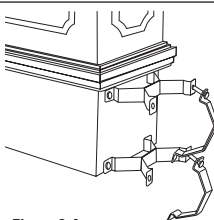

Figure 3-A

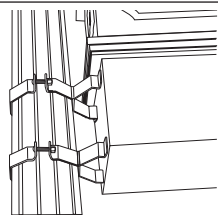

Figure 3-B

4

4-A.) Attach the address scroll to the bottom of the newspaper tube using the provided 3/4" x 1/4-20 bolt and (1) nylock Nut. The newspaper tube has a predrilled hole that is slotted for easy adjustment for height of the mailbox on the post.

(The Augusta and the Nevern do not use an address scroll).

4-B.) Use the remaining (1) 3/4" x 1/4-20 bolt to attach the bottom of the address scroll directly to the post. A threaded stainless steel insert is already in the post for this purpose.

(The Augusta and the Nevern do not use an address scroll).

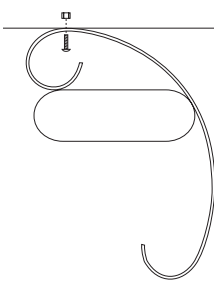

Figure 4-A

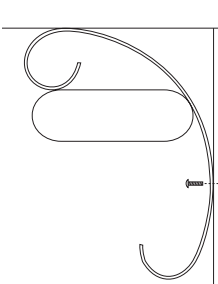

Figure 4-B

Applicable to: Monroe, Tallahassee, Columbus, Port Angeles, Warwick, Camrose, Riverside

Assembly Instructions For Double Side Mount, Full Post Option

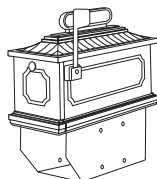

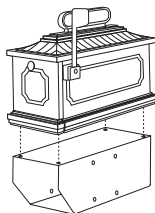

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel Nuts & bolts)

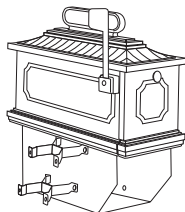

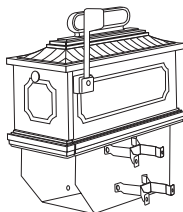

1

Attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box. If your mailbox style does not use newspaper tubes, skip ahead to the next step.

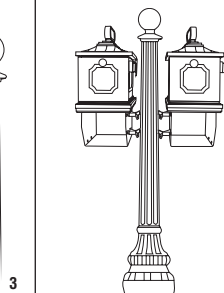

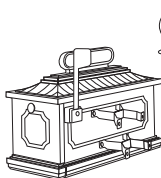

2

Fasten the 1812 brackets (X in shape) to the back of the newspaper tube utilizing the (4) 1/2" x 1/4-20 bolts & (4) nylock Nuts. Use the (4) existing predrilled holes. When finished, these brackets will wrap half way around the post where they will meet with the 1812 brackets from the 2nd newspaper tube.

3

If your mailbox does not use newspaper tubes, the 1812 brackets (X in shape) will attach with (4) predrilled holes directly to the side of the 1812 mailbox. (The Tallahassee option does not use a newspaper tube)

4

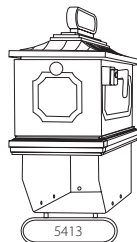

Bring each of the (2) complete mailbox units up to the opposite side of the post and fasten the two pairs of 1812 brackets to each other using the remaining (4) 1-1/2" x 1/4-20 bolts and (2) nylock Nuts. Adjust for height, and tighten into place.

3

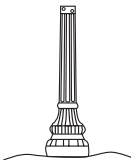

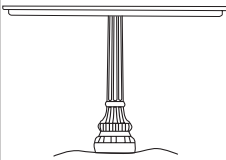

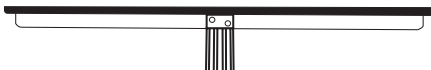

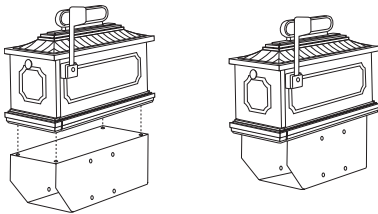

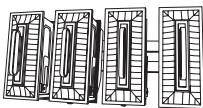

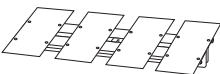

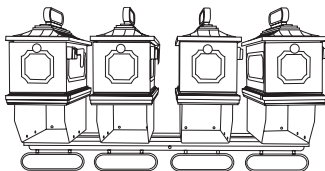

4

5

If your mailbox uses address plates, these can now be attached using (2) 1/2" x 1/4-20 bolts and (2) nylock Nuts per address plate. At the bottom of each newspaper tube are two sets of predrilled holes allowing for an assembly that is perpendicular or parallel to the direction of the newspaper tube.

Applicable to: Washburn, Underwood, Salem, Montgomery, Buckhorn, Wales, Park Ridge, Greenville, Sutherland, Carthage, Glastonbury, Canterbury

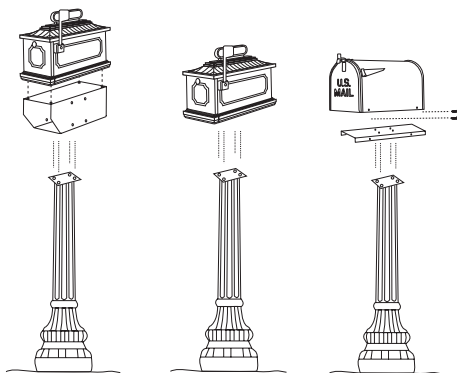

Assembly Instructions For Top Mount Rail Options (double, triple, and quad)			
<p><i>Tools Needed (not provided)</i></p> <ul style="list-style-type: none">• 7/16" socket or adjustable wrench (7/16" socket is preferable)• Phillips screw driver• No Drilling is required (all necessary mounting holes have been pre-drilled at factory)• All necessary hardware is provided (i.e. stainless steel Nuts & bolts)			
1	With the post securely mounted into the ground with concrete, place the horizontal rail onto the post. When done correctly, the (2) predrilled mounting holes will line up perfectly.		
2	Attach the rail to the post using the provided (2) 3-1/2" x 1/4 -20 stainless steel bolts and (2) nylock Nuts.		
3	Attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box. If your mailbox style does not use newspaper tubes, skip ahead to step 4.		
4	4-A.) Using (4) 3/4" x 1/4-20 screws and (4) nylock Nuts, attach the newspaper tubes directly to the horizontal rail. If your mailbox style does not use newspaper tubes, use the bolts to attach directly to the horizontal rail through the predrilled holes in the mailbox.	 <p>Figure 4-A</p>	 <p>Figure 4-B</p>
	4-B.) If your mailbox style uses medium size rural mailboxes, acrylic mounting plates will be provided instead. Using self-tapping screws, attach mailboxes to these plates before next step.		
5	At this time, if optional address plates were ordered they can be installed to the rail below each mailbox or tube using the predrilled holes and (2) 3/4" x 1/4-20 bolts & (2) nylock Nuts.		

Applicable to: Everett, Rosedale, Oakridge, New Hampton, Newport, Brunswick, Bailey, Norwich, Wilton, Durham

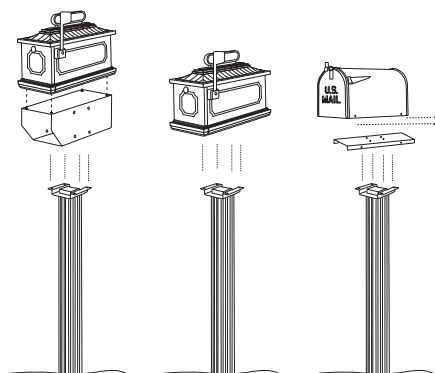

Assembly For Single Top Mount On Washington Post or Senator Post

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel nuts & bolts)

*Everett, Newport, New Hampton,
Bailey, Norwich*

Rosedale, Oakridge, Durham, Wilton

1

All above units use a 41/2" x 41/2" mounting plate which will arrive to customer already attached to the top of the cut Washington Post.

1

All above units use a Universal Mounting Bracket which will arrive to customer already attached to the top of the Senator Post.

2

If your mailbox style uses a newspaper tube, attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box.

2

If your mailbox style uses a newspaper tube, attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box.

3

Using the (4) pre-drilled holes on the bottom of the newspaper tubes, attach the newspaper tube to the 41/2" x 41/2" mounting plate using the provided 1/2" x 1/4-20 bolts and matching nylock Nuts.

3

Using the (4) pre-drilled holes on the bottom of the newspaper tubes, attach the newspaper tube to the 41/2" x 41/2" bracket using the provided 1/2" x 1/4-20 bolts and matching nylock Nuts.

4

In case of the Everett:
A black acrylic bracket will be provided with (4) pre-drilled holes. Align with holes on the 41/2" x 41/2" mounting plate and fasten tight, using the provided 3/4" x 1/4-20 bolts and matching nylock Nuts.

4

In case of the Rosedale:
A black acrylic bracket will be provided with (4) pre-drilled holes. Align with holes on the 41/2" x 41/2" bracket and fasten tight, using the provided 3/4" x 1/4-20 bolts and matching nylock Nuts.

5

Once the acrylic bracket is secure to the mounting plate, place the rural mailbox atop the bracket. Using the (4) self tapping phillips screws, fasten through the mounting holes on the side of the rural mailbox directly into the acrylic bracket.

5

Once the acrylic bracket is secure to the mounting plate, place the rural mailbox atop the bracket. Using the (4) self tapping phillips screws, fasten through the mounting holes on the side of the rural mailbox directly into the acrylic bracket.

Applicable to: Port Hill, Eastport, Visby

Assembly Instructions For Quad Mount, (for Port Hill/Eastport/Visby)

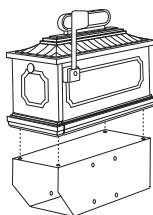

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel nuts & bolts)

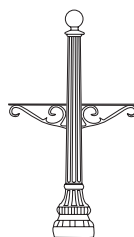

1

Attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box.

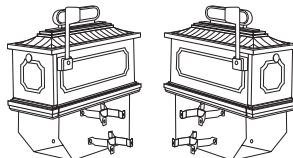

2

Attach the (2) cast aluminum scroll brackets to the Washington Post using the (4) 1-1/2" bolts. Place the bolts through the (4) existing pre-drilled holes, each fitted with a steel threaded insert (2 holes per side).

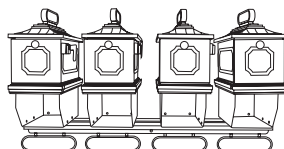

3

Fasten the 1812 brackets (x in shape) to the side of the newspaper tube utilizing the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts. Use the 4 existing pre-drilled holes. When finished, these brackets will wrap half way around the post where they will meet with the 1812 brackets from the second newspaper tube. This will make up the (2) inside box units closest to the Washington Post.

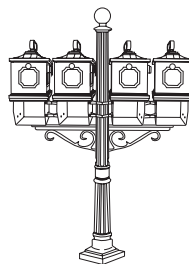

4

Similar to Step 3; Attach the 1812 brackets to the opposite side of the same newspaper tubes. This time the 1812 brackets will attach directly to the last set of newspaper tubes in the same manner.

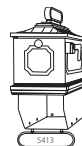

5

Bring each of the (2) complete mailbox units up to the opposite side of the post, just above the previously installed scrolls, and fasten the two pairs of 1812 brackets to each other using the remaining (4) 1-1/2" x 1/4-20 bolts and (2) nylock Nuts. Adjust for height with scroll, and tighten into place.

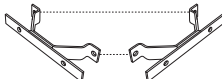

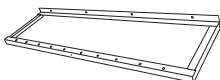

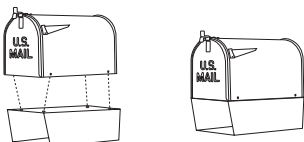

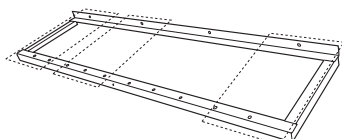

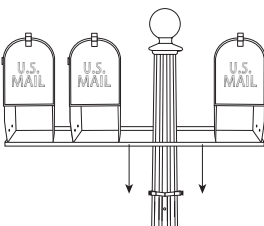

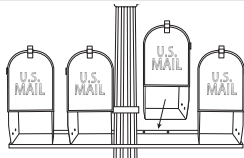

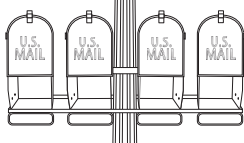

7

If your mailbox option uses address plates, these can now be attached using (2) 1/2" x 1/4-20 bolt and (2) nylock Nuts per address plate. At the bottom of each newspaper tube are two sets of pre-drilled holes allowing for assembly that is perpendicular or parallel to the direction of the newspaper tube. **Note: Newspaper tubes do not attach to Porthill brackets**

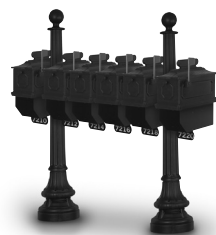

Applicable to: Carrington Colonial

Assembly Instruction For Carrington Mailbox		
<p>Tools Needed (not provided)</p> <ul style="list-style-type: none">• 7/16" socket or adjustable wrench (7/16" socket is preferable)• Phillips screw driver• No Drilling is required (all necessary mounting holes have been pre-drilled at factory)• All necessary hardware is provided (i.e. stainless steel Nuts & bolts)		
1	With the Washington Post securely mounted in the ground, locate the two side mount brackets, and attach them around the Washington Post using the provided (2) 2" x 1/4-20 bolts and (2) Nylock Nuts. Placement should settle just above preinstalled stainless steel threaded insert.	
2	Assemble the Carrington support brackets (4 angle pieces) using the provided 3/4" x 1/4-20 bolts and nylock Nuts. See drawing for detail.	
3	Attach the mailbox to the newspaper tube using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box.	
4	Line up the holes at the bottom of the newspaper tubes with the holes of the Carrington support bracket. Attach (3) box/paper tube units to the assembled support bracket using the provided (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per unit. Either one of the middle units is not attached yet to leave clearance for the entire unit to slip over the finial of the Washington post in the next step.	
5	Place the Carrington bracket with (3) mailboxes & tubes so far, over the post as shown, and lower into line with preinstalled steel threaded insert on Washington post. Using (1) 2" x 1/4-20 bolts, attach the front frame of the Carrington bracket to the post.	
6	Now the side mount brackets, which were attached to the Washington post in Step 1, need to be attached to the newspaper tubes. This is done using the existing holes on the newspaper tubes, and (2) 3/4" x 1/4-20 bolts and (2) nylock Nuts for each bracket. Fasten & tighten into place.	
7	Attach the last mailbox/tube unit to the Carrington support bracket utilizing the provided (4) 3/4" x 1/4-20 bolts & (4) nylock Nuts. (This is done the same way it was done in Step 4)	
8	If your mailbox option uses address plates, these can now be attached using (2) 3/4" x 1/4-20 bolts and (2) nylock Nuts per address plate. Below each newspaper tube, but not on the Carrington bracket, are (4) sets of predrilled holes allowing for the addition of the address plates. Attach using the provided (2) 3/4" x 1/4-20 bolts & (2) nylock Nuts per tube.	

Applicable to: Morganton 1812

Assembly Instructions For Morganton Mailbox

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel Nuts & bolts)

1	Assemble the cross support by attaching the Morganton end brackets to each side of the Morganton support bracket using (2) 3/4" x 1/4-20 bolts and (2) nylock Nuts for each side.	
2	Using (2) 1-1/2" x 1/4-20 bolts and (2) nylock Nuts, the (2) back brackets (C-shape) will wrap halfway around each Washington post, and attach to the previously assembled Morganton support bracket as shown.	
3	Attach mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box. All necessary holes have been pre-drilled.	
4	Line up the (4) pre-drilled holes at the bottom of each newspaper tube with the pre-drilled holes on the horizontal support bracket. Attach the (4) center mailbox units to the horizontal support bracket using (4) 1/2" x 1/4-20 bolts and (4) nylock Nuts per tube.	
5	Fasten (2) 1812 brackets (x in shape) to opposite sides of the newspaper tubes of the (2) remaining mailbox units. Use the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts. Use the 4 existing pre-drilled holes. When finished, these brackets will wrap half way around the post where they will be attached to back brackets to hold them in place.	
6	Using (2) back brackets (C-shape) and (4) 1-1/2" x 1/4-20 bolts attach mailbox unit to each post as shown. Placement should be directly above the previously installed Morganton brackets. This bracketing will support the (2) outermost mailbox units.	
7	If your mailbox option uses address plates, these can now be attached using (2) 3/4" x 1/4-20 bolt and (2) nylock Nuts per address plate. At the bottom of each newspaper tube are two sets of pre-drilled holes allowing for assembly that is perpendicular to the direction of the newspaper tube.	

Applicable to: Richmond, Baton Rouge, Altair, Wilkes, Oakhill, Delta

Estate Series • Assembly Instructions for Front Mount, Full Post Option

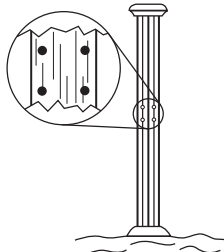

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel Nuts & bolts)

1

With Estate series post securely mounted into the ground, locate the (4) stainless steel threaded inserts that are already set into the front of the post. This is where the Estate Series bracket will mount to.

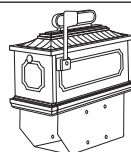

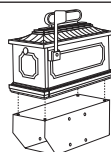

2

Fasten the "Estate Bracket" to front of the Estate series post utilizing the (4) 3/4" x 1/4-20 bolts, and the preinstalled stainless steel inserts.

3

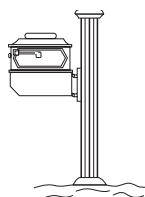

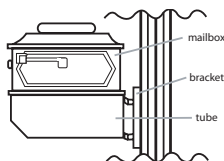

Attach the mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box and tube.

4

Bring the complete mailbox/tube unit to the front of the post and line up the predrilled holes in the back of the newspaper tube with the (4) holes on the estate bracket. Fasten to the estate bracket using the (4) 1/2" x 1/4-20 bolts and (4) nylock Nuts.

(If your mailbox does not use a newspaper tube, the estate bracket will fasten directly to the back of the mailbox using (4) predrilled holes.)

5

5-A.) Attach the address scroll to the bottom of the newspaper tube using the provided 3/4" x 1/4-20 bolt and (1) nylock Nut. The newspaper tube has a pre-drilled hole that is slotted for easy adjustment for height of the mailbox on the post.

(The Richmond and the Altair do not use an address scroll)

(If your mailbox does not use a newspaper tube, the scroll will attach directly to the bottom of the mailbox.)

5-B.) Use the remaining (1) 3/4" x 1/4-20 bolt to attach the bottom of the address scroll directly to the post. A threaded stainless steel insert is already in the post for this purpose.

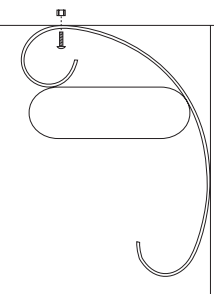

Figure 5-A

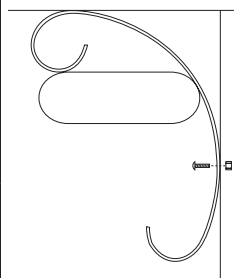

Figure 5-B

Applicable to: Dixon, Abbot, Porterfield, Lawrence

Estate Series • Assembly Instructions for Side Mount, Full Post Option

Tools Needed (not provided)

- 7/16" socket or adjustable wrench (7/16" socket is preferable)
- Phillips screw driver
- No Drilling is required (all necessary mounting holes have been pre-drilled at factory)
- All necessary hardware is provided (i.e. stainless steel Nuts and bolts)

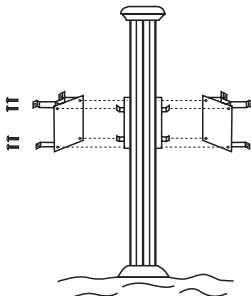

1

With Estate series post securely mounted into the ground, locate the (4) stainless steel threaded inserts that are already set into each of the two sides of the post. This is where the Estate Series brackets will mount to.

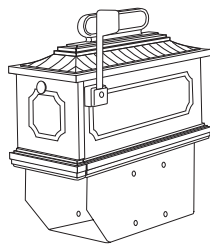

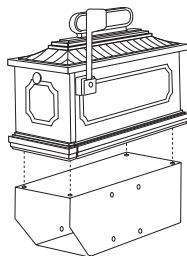

2

Fasten the "Estate Bracket" to front of the Estate series post utilizing the (4) 3/4" x 1/4-20 bolts, and the preinstalled stainless steel inserts.

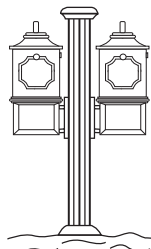

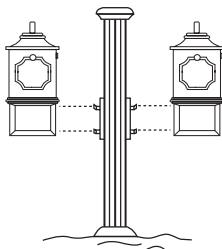

3

Attach the mailboxes to the newspaper tubes using the (4) 3/4" x 1/4-20 bolts and (4) nylock Nuts per box and tube.

4

Bring the complete mailbox/tube units to each side of the post and line up the (4) predrilled holes in the side of the newspaper tubes with the (4) holes on each Estate series bracket. Fasten the estate bracket using the (4) 1/2" x 1/4-20 bolts and (2) nylock Nuts per each box and tube set.

Complete

Installation & Assembly of Colonial Carriage Light

Items Needed:

- Adjustable Wrench
- Phillips screw driver
- Wire Cutters
- Step Ladder

Parts List:

- Fixture Body
- Top Fixture Cover
- Hardware Bag
- Washington/French Courtyard Post

Before Installation:

***WARNING:**

THE FOLLOWING INSTRUCTIONS MUST BE FOLLOWED WHEN INSTALLING THIS LIGHT FIXTURE IN ACCORDANCE WITH THE LOCAL CONSTRUCTION CODES IN YOUR AREA. FAILURE TO COMPLY WITH THESE REQUIREMENTS COULD LEAD TO ELECTRICAL SHOCK OR FIRE.

***WARNING:**

ALWAYS SHUT OFF POWER AT THE CIRCUIT BREAKER OR DISCONNECT FUSE WHEN INSTALLING OR REPAIRING THIS OR ANY OTHER ELECTRIC APPLIANCE. FAILURE TO DO SO MAY RESULT IN SEVERE INJURY OR EVEN DEATH.

***WARNING:**

LIGHTING MUST BE HARD-WIRED TO HOME ELECTRICAL SYSTEM.

- 1.) After post is installed, set fixture on top of post and note hole locations in the steel post insert (tenon).
- 2.) Remove fixture and expose the wiring. Twist the white fixture wire with the white conduit wire (use wire Nuts to secure connections).
- 3.) Twist the black fixture wire with the black conduit wire (use wire Nuts to secure connections).
- 4.) Twist the copper fixture wire with the conduit ground wire (use wire Nuts to secure connections).
- 5.) Tuck wires into steel post insert (tenon) and replace fixture onto tenon. Use provided screws to secure fixture to steel post tenon.
- 6.) Next, insert and twist light bulb* into socket. Use 1 bulb. Type A, maximum 100W or less. DO NOT OVER LAMP.
- 7.) Place top cover on the fixture and secure into place from the bottom using the provided screws.
- 8.) Turn the power back on.

*** Bulb not provided**

LIMITED WARRANTY

Postal Products Unlimited, Inc. products are guaranteed in material and workmanship to the original purchaser for a period of one year from the date of product shipment.

Postal Products Unlimited's obligations under this warranty are expressly limited to the repair or replacement of any unit or component part, which is at the sole discretion of Postal Products Unlimited. All products must be returned to Postal Products Unlimited at the customer's expense with prior authorization from Postal Products Unlimited. Postal Products Unlimited's obligation shall in no event include damage resulting from transportation, mishandling, neglect, misuse, acts of nature or vandalism.

* Improper installation will void this warranty.

MAINTENANCE:

Product is not maintenance free.

Regarding steel-based product: Cracks in the paint, salt spray, road salt, and excessive UV rays could cause corrosion or deterioration of tubes, scrolls, brackets, etc.

Extended life components are available (stainless steel), but are a separate purchase. However, sun, weather, road chemicals etc, still adversely affect plastic, finish, and materials of extended life components.

It is the purchaser's responsibility to regularly inspect the mailbox system for deterioration of components, finishes or hardware. Treat product or replace components immediately upon noticing deterioration or damage. All components are available for sale directly from factory or authorized distributor.

Surfaces with corrosion can be treated with rust inhibiting paint. Corrosion should be removed with steel wool and surface treated before painting.

Replace hardware when finish deteriorates. Hardware can be treated with silicone spray or lubricant to combat corrosion issues. Hardware and components that are not replaced when deterioration occurs can cause additional oxidational discoloration of other components.

Postal Products Unlimited, Inc.

FREIGHT DAMAGE

Damaged or lost merchandise claims must be filed with the carrier within 10 days of receipt of goods. Once the product leaves any of our warehouses it becomes property of the customer. Please follow these steps when receiving products.

- 1. Check your piece counts. If you are short a product or package, be sure to list it on the carriers delivery receipt.**
- 2. Give a detailed inspection for damage. If the carton even appears to be damaged anywhere, make sure to open and inspect goods thoroughly. If there is damage, note it on the delivery receipt and call our customer service department immediately.**

RETURNS

No returns will be accepted without a return authorization #. Please call our customer service department with return request. If the product shipped is the product ordered, we may request a restocking fee up to 50%. Some custom products are not returnable. All returns must be shipped back at customer's expense unless otherwise agreed upon.
