

IMPORTANT NOTICE

1.To allow each battery to reach full capacity, the light need to be placed in full sunlight for the first 12 hours. Failure to do so can shorten the life of the battery or operation of the light.

2.This solar light is equipped with a brightness sensor. It is normal that it does not light up during the day. It is not a quality problem.

3.While in use, make sure the switch is in "ON" position, otherwise press the switch again.

If you have questions, our customer service team is happy to help.
