

Assembly Instructions for **Model 1747590**

Assembly Method

1. The lamp components are as follows:

2. Connect the end of the lamp arm with the wire to the ceiling plate, and secure it with a patterned washer and nut.

3. Locate the suspension cable fastener and the cross mounting bracket.

4. Lift the lamp arm to the ceiling and measure the installation distance.

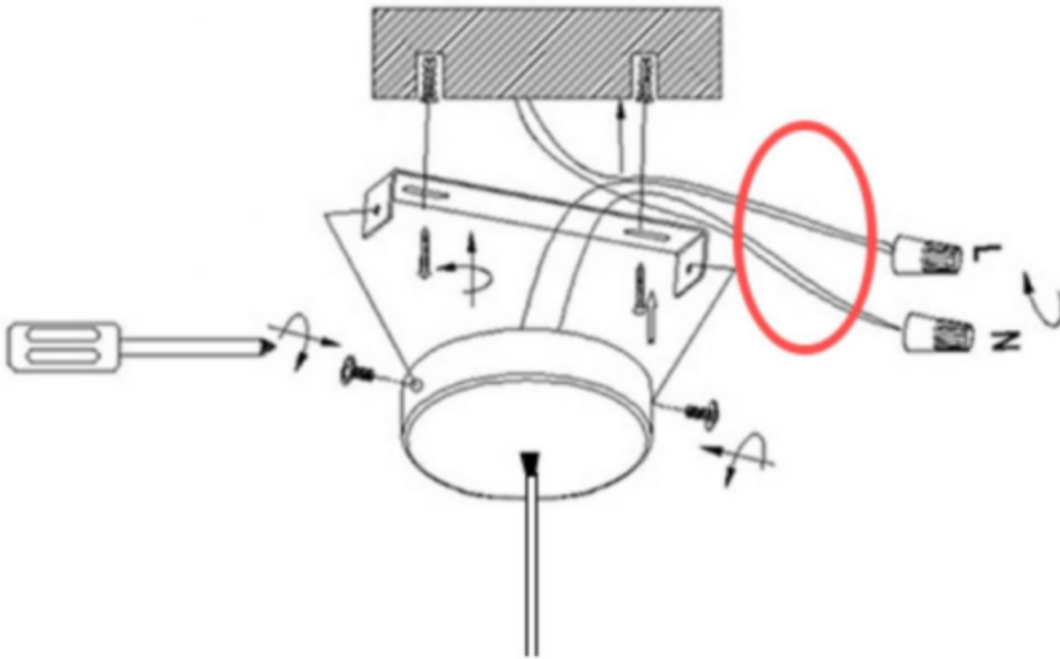

5. Drill a hole on one side of the ceiling plate to fix the mounting bracket.

Drill one hole on one side of the suspension cable to fix the threaded tube.

6. Connect the lamp wires to the power wires.

7. Fix the ceiling plate to the mounting bracket with screws.

8. Press the protrusion at the hole position, insert the suspension cable into the fastener, and it will automatically lock in place when released.

9. Screw the fastener into the threaded tube.

10. Install as shown in the diagram.

The installation is complete.

Your fixture is now assembled and ready to use.
