

Firewood Log Rack Hoop and Cover

SECTION A

Parts List

Part#	Description	Qty
1	Curved Pipe	6
2	"W" Shaped Legs with Plastic Caps	2
3	Spreader Bar with Plastic Caps	2
4	Nut & Bolt and Washer Sets	11

SECTION B

Caution

Before starting assembly, read the instructions carefully as incorrect assembly can cause misalignment.

Note on unpacking:

The Curved Pipes (1) are wrapped in 2 packs of 3 sections - Keep each pack separately as a set.

The difference being one section has an extra hole in the centre. This is the base section (Fig 1).

Note: DO NOT tighten nut & bolt sets during assembly.

STEP 1

Connect three Curved Pipes (Part 1) to form a ring, and make two such rings in total. Ensure that the pipe with a hole in the middle is positioned at the bottom of the ring.

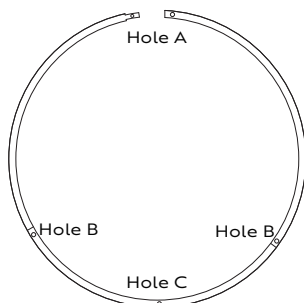

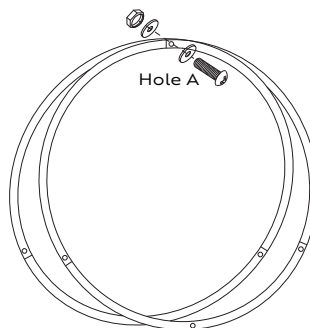

Fig 1

STEP 2

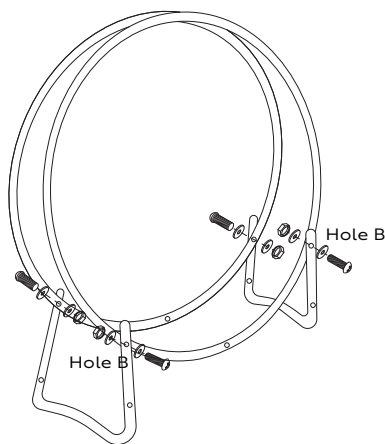

Align the two rings with hole A at the top. Secure them together with screws and washers.

Note: Do not fully tighten the screws to avoid difficulty in subsequent assembly steps.

STEP 3

Use the W-shaped Leg (Part 2) to connect to hole B, and secure it with screws and washers. Repeat this on the other side.

STEP 4

Attach the Spreader Bar (Part 3) to the ring using screws and washers through hole C, and repeat this on the other side. Then connect the Spreader Bar (Part 3) to W-shaped Leg (Part 2) on both sides with screws and washers through hole D. Place the rack on a flat surface, and tighten all the screws to finish the whole assembly.
