

Important Pre-Assembly Instructions

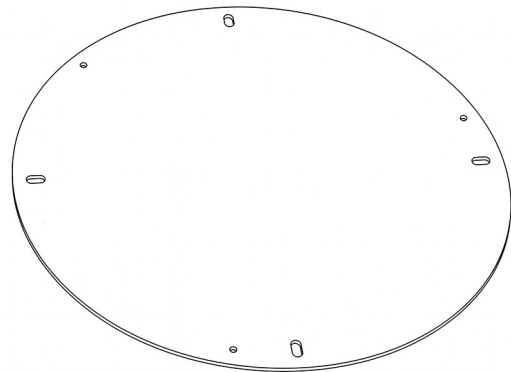

1. Read this entire manual thoroughly before assembly and strictly follow all installation steps.
2. Check the outer carton for dents, cracks or impact damage right after receiving the goods.
3. If the packaging is intact, unpack all parts and confirm every component and hardware is complete, scratch-free and undamaged.

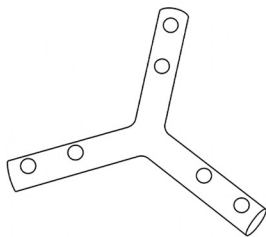

① Base × 3

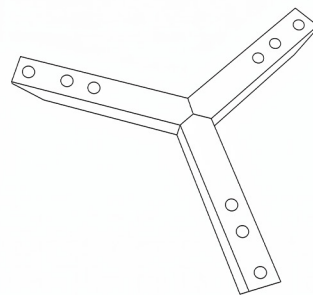

② Tabletop × 1

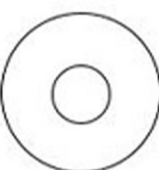

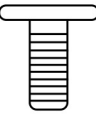

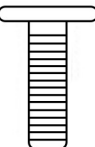

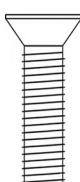

③ Connecting plate × 1

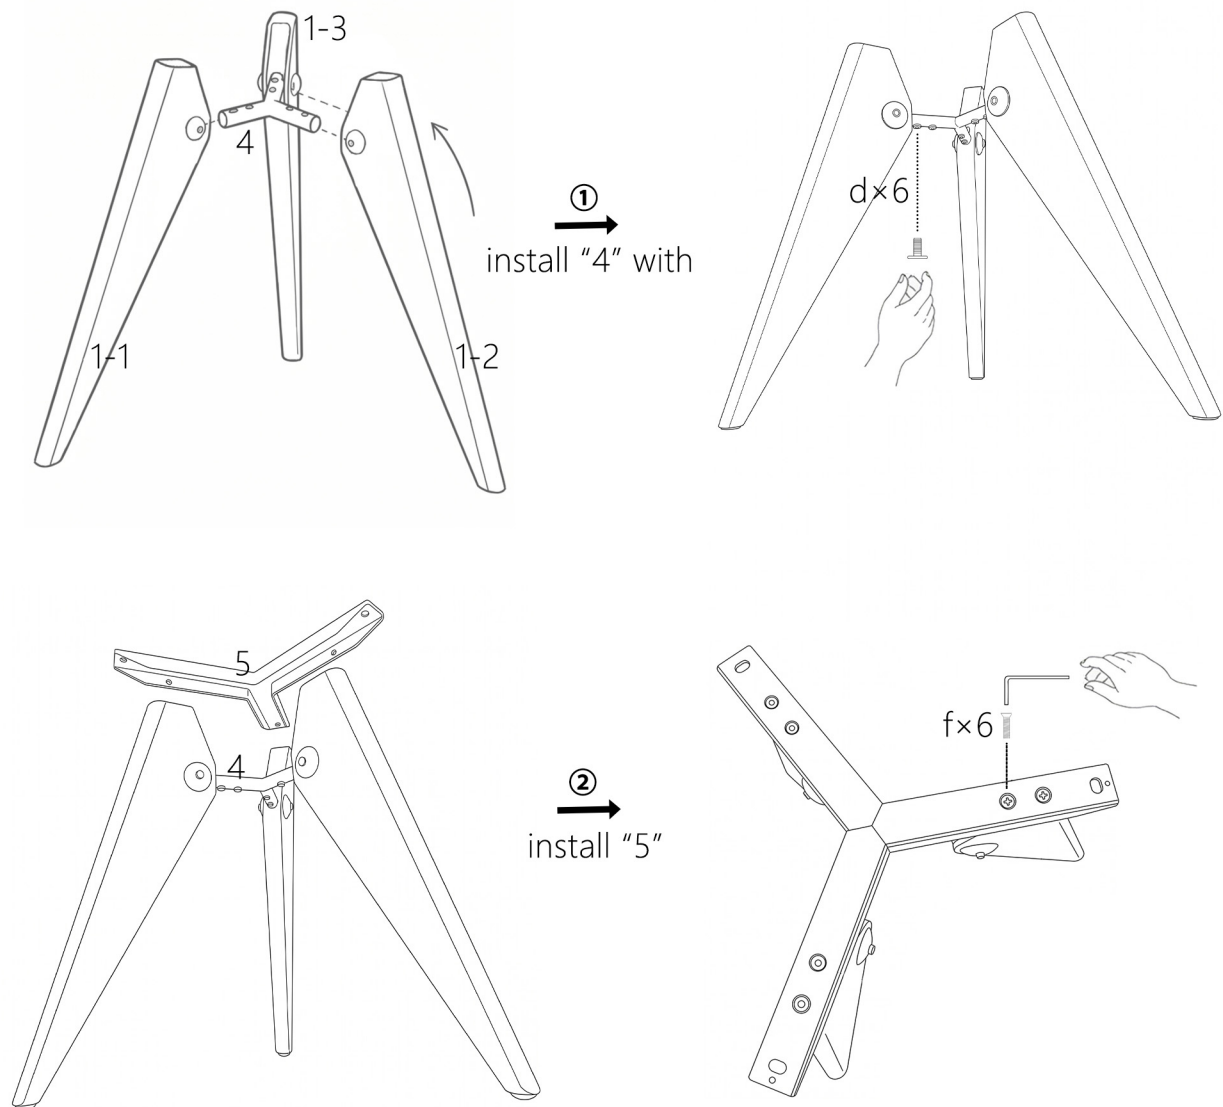

④ Small triangular connecting bracket x1

⑤ Large triangular connecting bracket x1

Installation components

Assemble Bases & Triangular Brackets

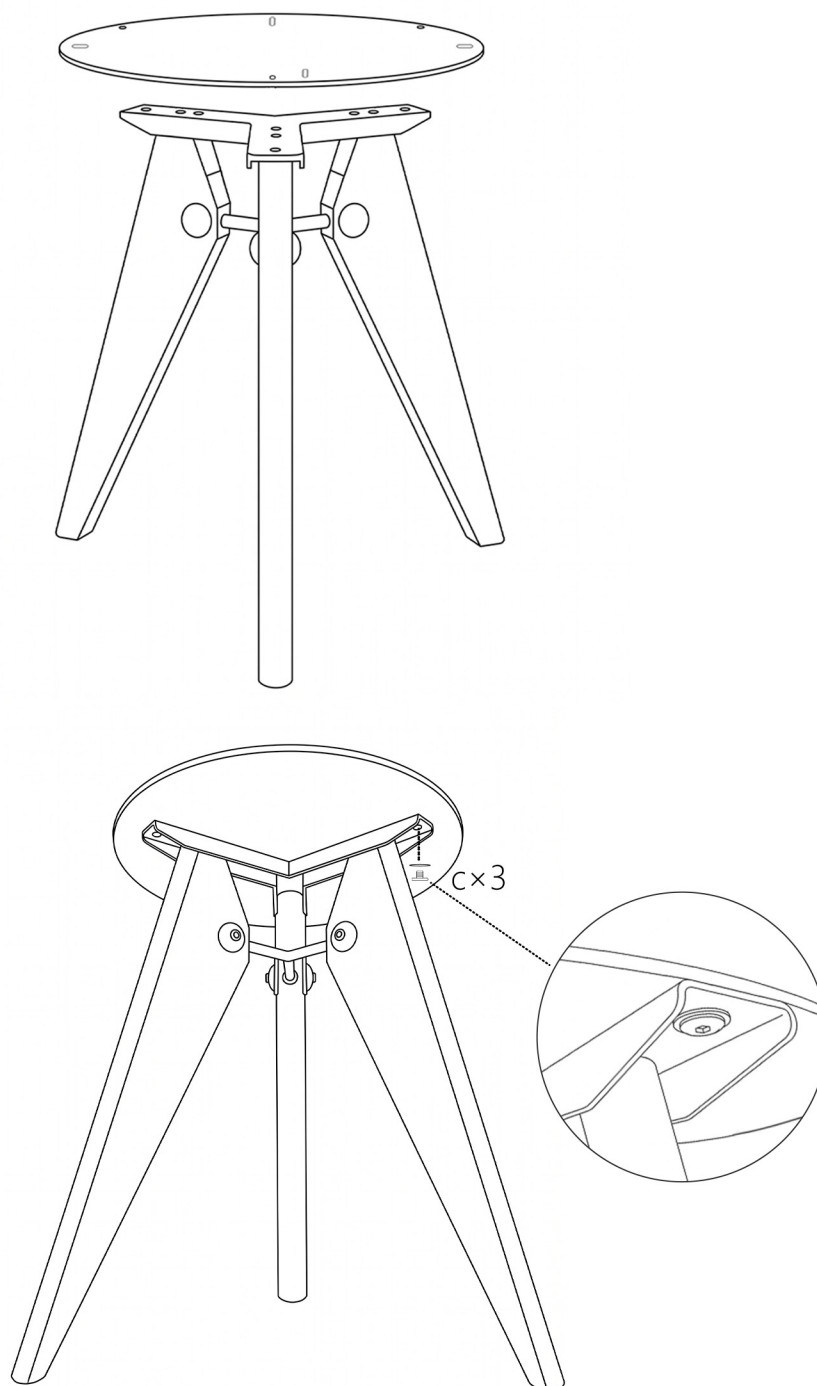

Step 1 Connect three bases with small triangular connecting bracket

1. Align the mounting holes of 3 bases with the holes on the small triangular connecting bracket.
2. Take d-type screws, insert screws upward from the bottom side and fasten loosely first.
3. Tighten all screws evenly to link three bases as one assembly.

Step 2 Install large triangular connecting bracket

1. Place the large triangular connecting bracket over the assembled small-bracket frame.
2. Align all corresponding mounting holes.
3. Take f-type angled countersunk screws to fasten and lock the bracket.

IMPORTANT WARNING: Tighten every screw evenly to prevent component deformation.

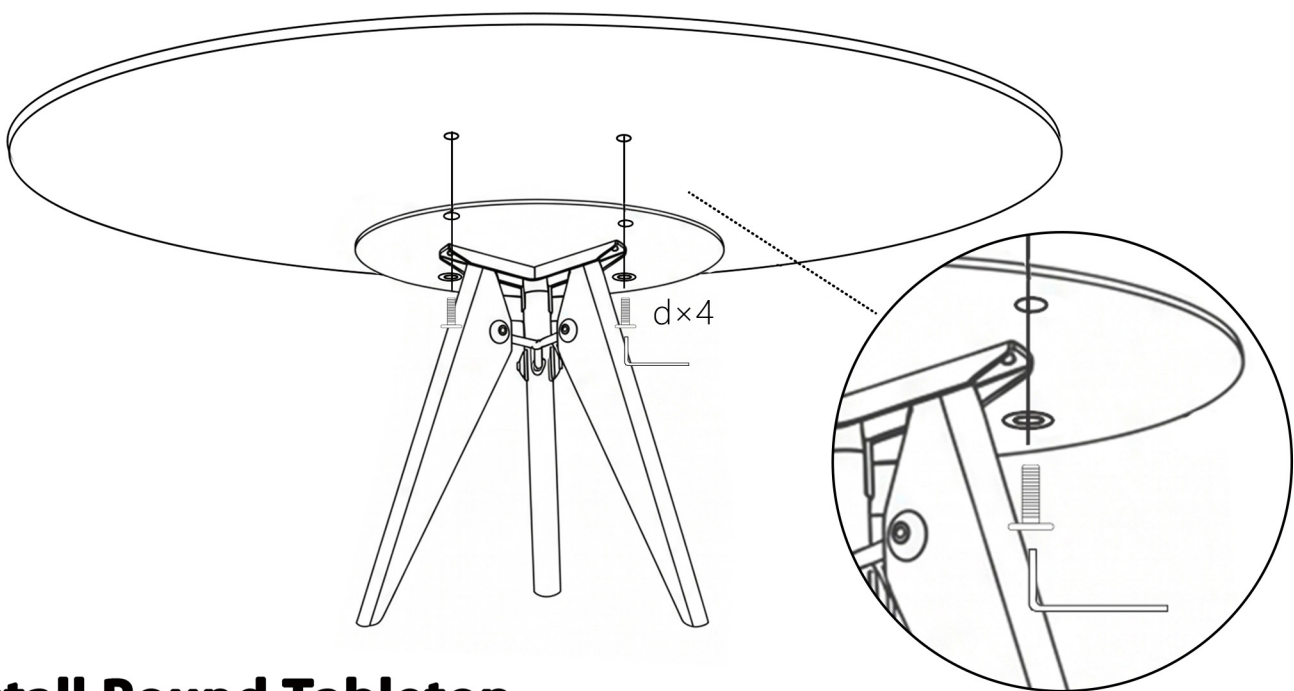

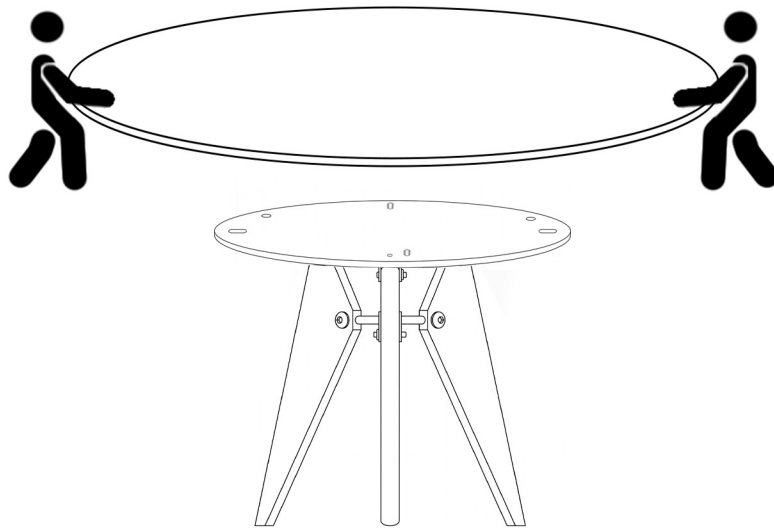

Fasten Connecting Plate to Base Assembly

1. Position the round connecting plate onto the pre-assembled base unit. Align holes on connecting plate with holes on large triangular bracket.
2. Fit one b-type flat washer onto each c-type screw.
3. Insert screws with washers upward from below through aligned holes. Hand-tighten all screws loosely at first.

IMPORTANT WARNING: Do NOT fully tighten screws at this stage. Keep all screws loosely fitted to avoid misalignment.

4. After all screws are in place, tighten each screw evenly and fully with hex screwdriver.

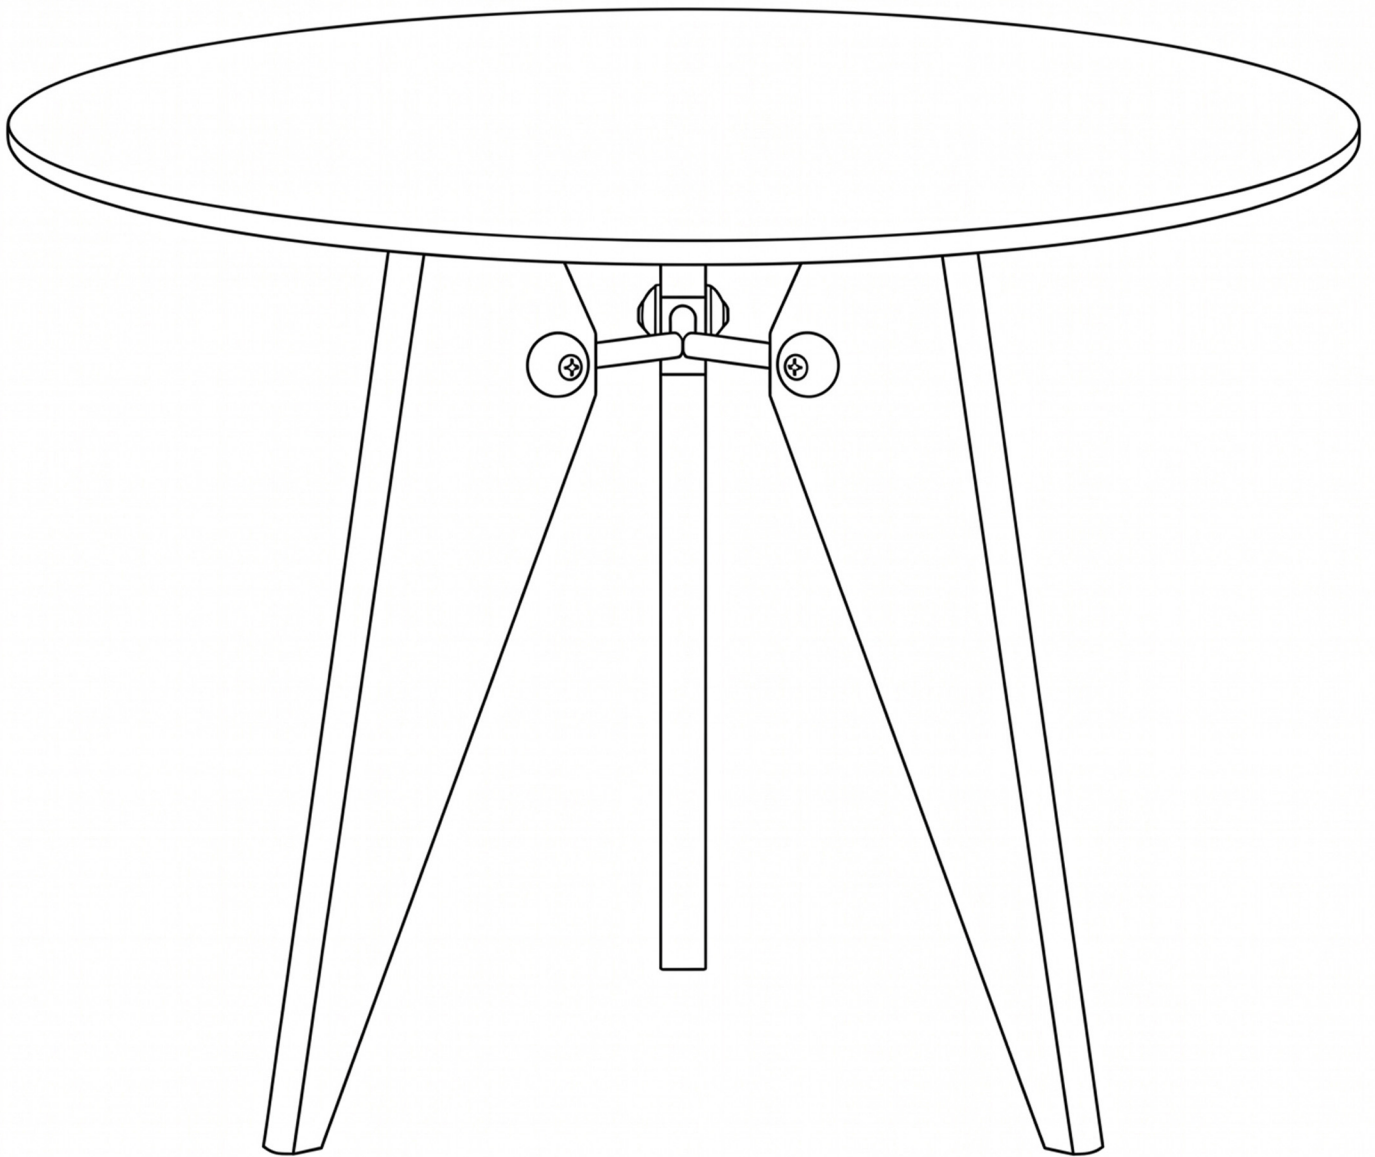

5

Install Round Tabletop

SAFETY REMINDER: The tabletop is heavy. Two people are required to lift and position it; do not install alone.

1. With another person' s help, lift the round tabletop and lay it evenly above the pre-assembled base assembly.
2. Match threaded holes on the underside of tabletop with holes on the round connecting plate.
3. Take d-type screws, hand-thread all screws through tabletop into connecting plate. Keep screws loosely fitted first.
4. After all screws are loosely seated, tighten each screw evenly one at a time with hex screwdriver to prevent uneven table surface.

Assembly Completed

- 1. Recheck all screws on the mount plate and tabletop to confirm all are fully tightened.**
- 2. Shake the table gently from all sides to test stability; there must be no wobble or abnormal rattling noise.**
