

**Why is a NOYO headboard artistic, personal and unique?**

Our headboards let you incorporate art into your bedroom. It's simple: Just choose your headboard size and then select a SlipArt™ cover from the gallery of artwork collections, carefully selected by NOYO and curated by featured artists.

What are sizes of headboard?

Headboard is 35 inches (87.5cm) high and comes in standard mattress widths:

- Twin/Single: 40 inches (100cm)
- Full/Double: 52 inches (130cm)
- Queen: 64 inches (160cm)
- King: 76 inches (190cm)

NOYO headboards consists of the following:

A **cedar wood headboard frame** – light, strong and fragrant- with Luan Mahogany face provides a strong surface to lean and recline against. Frame come in modules and is assembles easily with only an Allen Key™, no power tools needed. Can be done by one person single-handedly!

Frame floats on wall as its dowels on back of frame slide over wall-brackets. Frame can be moved horizontally into right position, where it sits firm and solid.

A **quilted pad** to stretch over wooden frame gives frame an upholstered look, a soft touch and comfortable feel to recline against. Pad is made of white quilted poly/cotton -similar to mattress covers-and is hypoallergenic. Pad is washable and will not shrink or lose its shape and fit.

SlipArt™ Slipcover is made of hardwearing Poly fiber cloth fabric but has the look and feel of Linen.

Slipcover is soft to the touch as ink is fully absorbed by fibers and does not "sit on top of fibers".

Slipcover is washable and will not fade, discolor, shrink or lose its shape and fit. Poly fiber cloth fabric is naturally flame retardant.

Wallbrackets are hand-crafted of solid cedar. They mount easily on a wall by placing only 2 screws each.

Quality hardware for installation on drywall and most wall types are provided.

Are SlipArt™ slipcovers environmentally safe?

SlipArt™ slipcovers are printed with state of the art technology and ink. Prints done on cloth fabric via Dye Sublimation process: results in clean, bright, beautiful colors and is an environmentally friendly process. Clean, dry transfer of the design without chemical, ink and water residue.

Inks used are water based, environmentally friendly as they contain no heavy metals or solvents. No special waste permits are necessary for this printing process. Water based inks leave no chemical smell to the printed cloth.

Inks are produced locally in –house and left over ink is recycled into other inks, such as black. Process produces no make-ready waste or loss of material as in conventional ink on paper printing.

Do I need a new bed?

NOYO headboards do not require you to buy a new bed.

NOYO headboards mount on a wall independent of your existing bed frame. The headboard can be mounted with no damage/alteration to your existing bed frame. Headboard mounts to the wall with two included wall-brackets. Simply mount the brackets and slide the headboard into place above the bed. Done!

What if I want to eventually buy a bigger bed. Can I still use the NOYO headboard?

Yes! NOYO headboards are designed to be sized up and down. Need a larger size headboard? Just insert an additional module for every size you want to go up and voila! You can go from Single bed to Double to Queen to King. Additional modules can be ordered separately at any time, check it out under Accessories!

Where are NOYO headboard frames and covers manufactured?

Designed, produced and made proudly in New Jersey! Made in the USA
