PRODUCT SIZE

INSTALLATION STEPS

1. Verify Faucet Spacing

- Confirm countertop hole locations before installation.
- Recommended spacing between mounting holes: 90–150 mm (3.54–5.91 in).
- Ensure all holes are aligned and level.

2. Prepare Faucet Components for Installation

Before installation, disassemble faucet components as shown.

- Loosen handle set screws with the supplied Allen key.
- Remove handle caps and decorative trim rings.
- c.Remove mounting hardware from faucet bodies.
- Separate spout and valve assemblies.

NOTE: Keep all removed parts for reassembly.

3. Install Faucet Components

- Insert faucet components through countertop openings.
- b. Install washers and mounting hardware underneath the countertop.
- Tighten mounting nuts securely.

NOTE: Ensure all components sit flat. Do not overtighten.

4. Install Tee Connector and Handle Components

- Install the tee connector according to the diagram.
- Insert handle stems into faucet bodies.
- Install handle caps and tighten set screws.

NOTE: When facing the faucet, install the HOT handle on the left and the COLD handle on the right.

5. Connect Hand Shower Hose

- Secure handles and confirm smooth operation.
- Install the handle caps and make sure the handles operate smoothly.
- Connect the hand shower hose to the designated outlet.
- Install pull-out hose weight (if included).

NOTE: Make sure the hose moves freely without kinking.

6. Connect Water Supply Lines and Hand Shower

CAUTION: Turn off hot and cold water supplies before installation.

- Connect the hot and cold water supply lines.
- Connect internal hoses according to the marked connections.
- Attach the hand shower to the hose and tighten by hand.

Note: Turn on the water supply and check all connections for leaks.

To maintain a clean appearance and optimal performance of your faucet, please follow these care instructions:

1. Rinse with clean water and dry with a soft cotton cloth.
2. For surface dirt or limescale buildup, use a mild liquid detergent or a colorless, non-abrasive glass cleaner. A non-abrasive polish may also be used.
3. DO NOT use: abrasive detergents or polishes, emery cloth, paper towels, scrapers, or other abrasive materials.
4. DO NOT use: acidic cleaners or cleaners and soaps containing insoluble abrasive granules
5. Mineral deposits may accumulate in the hand shower over time, reducing water flow. If this occurs, unscrew the hand shower, rinse it thoroughly with clean water, and reinstall it.
