

Rolling Mobile File Instruction Sheet

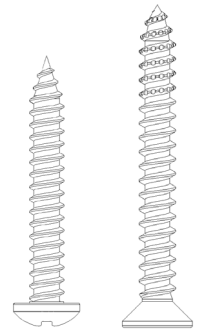

STEPS:

1. (a,b) Let's get your knobs turned around! Reverse the knobs with a Phillips head screwdriver. Unscrew each inward-facing knob and reattach by screwing the knob onto the outside of the unit.
2. (a,b) To allow your piece to roll around on wheels, attach the casters. One corner at a time, line up the bracket on the caster to the predrilled holes on the underside of the piece. Screw on with a Phillips head screwdriver. Repeat for all four corners.
3. Care for your piece by dusting it with a slightly damp rag. Happy cleaning!

Hardware Provided:

Casters x 4

1 1/4" Screw x 1
5/8" Screw x 16

Tools Needed:

Phillips head
screwdriver
