

PILE: 100% PRINTED VISCOSE

CARE INSTRUCTIONS: *Viscose* is a delicate fibre we recommend that it be cleaned professionally. Vacuum your rug regularly with a suction only vacuum cleaner as a beater- bar vacuum cleaner could damage the pile. Do not allow your rug to become wet as viscose can stain. Never rub a spill. Remove spills immediately by blotting using a dry absorbent white cloth or white paper towel. Do not use bleach or other liquid cleaning products. We recommend the use of an anti-slip pad to reduce trip hazards and protect the floor surface.
