

HANGING INSTRUCTIONS

Step 1: Position the Rack

Hold the rack against the wall at the desired height and use a level to ensure it is straight.

If Mounting Into a Stud

Step 2: Install the Screws

Drive the supplied screws through the pre-drilled holes and directly into the wall stud until the rack is secure and flush against the wall.

If Mounting Into Drywall

Step 2: Mark the Mounting Locations

Partially thread the supplied screws into the pre-drilled holes on the back of the rack until the screw tips slightly protrude from the back.

With the rack held level in its desired position, gently press the screw tips against the wall to create reference marks for drilling.

Step 3: Install the Anchors

Using a 3/16" drill bit, drill holes at the marked locations. Insert the supplied wall anchors until flush with the wall.

Step 4: Mount the Rack

Align the rack with the anchors and drive the supplied screws into the anchors until the rack is secure and flush against the wall.

Final Check

Confirm the rack is level and tighten screws if needed. Do not over-tighten.

CARE INSTRUCTIONS

Wipe clean with a damp cloth.
Avoid harsh chemicals and abrasive cleaners.
