Dimmable fixture - see attached list for compatible dimmer switches

1

PREPARE FIXTURE

If there is an existing fixture remove it. Expose the supply wires from the J-box. Prepare the fixture by placing the rod through hole in the canopy. Feed both the fixture and ground wires up through the rod to the canopy. Screw the first rod onto the nipple protruding from the canopy. Screw the additional rod(s) together dependent upon the desired length.

Connect the white supply wire to the white fixture wire. Secure with the supplied wire nuts. Attach the green J-Box wire around green hexagonal head screw or connect it to the green supply grounding wire of the fixture. Secure all wires with electrical tape (not supplied). Tuck all wires carefully into the J-box

3

SECURE CANOPY & GLASS SHADE AND INSERT BULB

Mount the crossbar to the J-box with the supplied mounting screws. Position the canopy over the crossbar such that the holes on the sides of the canopy line up with the holes in the crossbar. Secure the canopy to the crossbar with the supplied screws. Remove the glass retaining ring, place glass over socket and secure with the retaining ring.

Insert the bulb.
