INSTALLATION INSTRUCTIONS

6.5'x9' Gazebo

Our team is available 24/7 to help with any product questions. Contact us anytime!

Warning

- Please read and understand this manual carefully before assembly. Before starting to assemble the product, please ensure that all parts are present. Please check the parts against the packing list. If you find any missing parts, please contact us.
- Any assembly or maintenance work on this product must be performed by adults. We recommend that at least two adults be involved.
- Please check your state and local regulations before purchasing. Some areas may require a permit for the installation and use of this product. There may be specific procedures in your area.
- Please install the Gazebo on a flat surface. Ground stakes are included with the product to secure the Gazebo to the ground.
- Do not assemble the Gazebo on sandy, muddy, or loose soil, as the ground stakes will not provide sufficient anchoring in these types of soil.
- If you wish to secure the Gazebo to a wooden deck or concrete surface, please use anchor bolts suitable for these surfaces.
- Some parts may contain sharp edges. Protective gloves are recommended.
- Keep children and pets away while assembling the Gazebo.
- Regularly check all nuts and bolts to ensure they are tightened.
- Before starting assembly, carefully read each step and ensure you understand each step.
- Please refer to the diagrams. Place all parts from the box in a clean area and lay them flat on the floor in front of you.
- Remove all packaging materials and place them back in the box. Do not discard the packaging materials until assembly is complete.

Maintenance

- Snow must be removed regularly during snowy weather. Remove snow when the snow accumulation on the roof exceeds 2 inches (5 cm). To avoid damage, use a plastic snow rake to remove excess snow and ice from the roof, and be careful to stay clear of falling debris.
- This Gazebo is for decorative and shading purposes only and is not designed to withstand severe weather conditions, including strong winds, heavy rain, and heavy snow.
- The steel components of this Gazebo are coated with rust-resistant paint. However, due to the inherent properties of steel, oxidation (rusting) may still occur on the surface if the protective coating is scratched. This is not a product defect and is therefore not covered under warranty.
- Please place the gazebo or heat source at a safe distance from wooden structures. Never allow open flames to come into direct contact with the wood panels. Due to the natural characteristics of wood, variations in grain, color, and texture are normal and do not affect the product’s performance. As the wood gradually acclimates to its environment, minor cracking, splitting, or fissures may occur. Such conditions are not covered by the warranty. To minimize cracking, we recommend regularly applying a wood preservative sealant and avoiding prolonged exposure to extreme humidity or direct heat sources.

Maintenance

- To minimize this occurrence, it is recommended to handle the product carefully during assembly and handling to avoid scratching the paint. If any scratches or damage occur, it is recommended to immediately repair the scratches with rust-resistant paint (not included).
- Do not use bleach, acid, or other abrasive cleaners on the roof or frame components.
- Please keep these instructions for future reference.

Matters needing attention

1.Two or more people are required for assembly.

2.Do not fully tighten screws prior to complete assembly.

3.Use a spirit level. Before proceeding, check that the device or component is perfectly level.

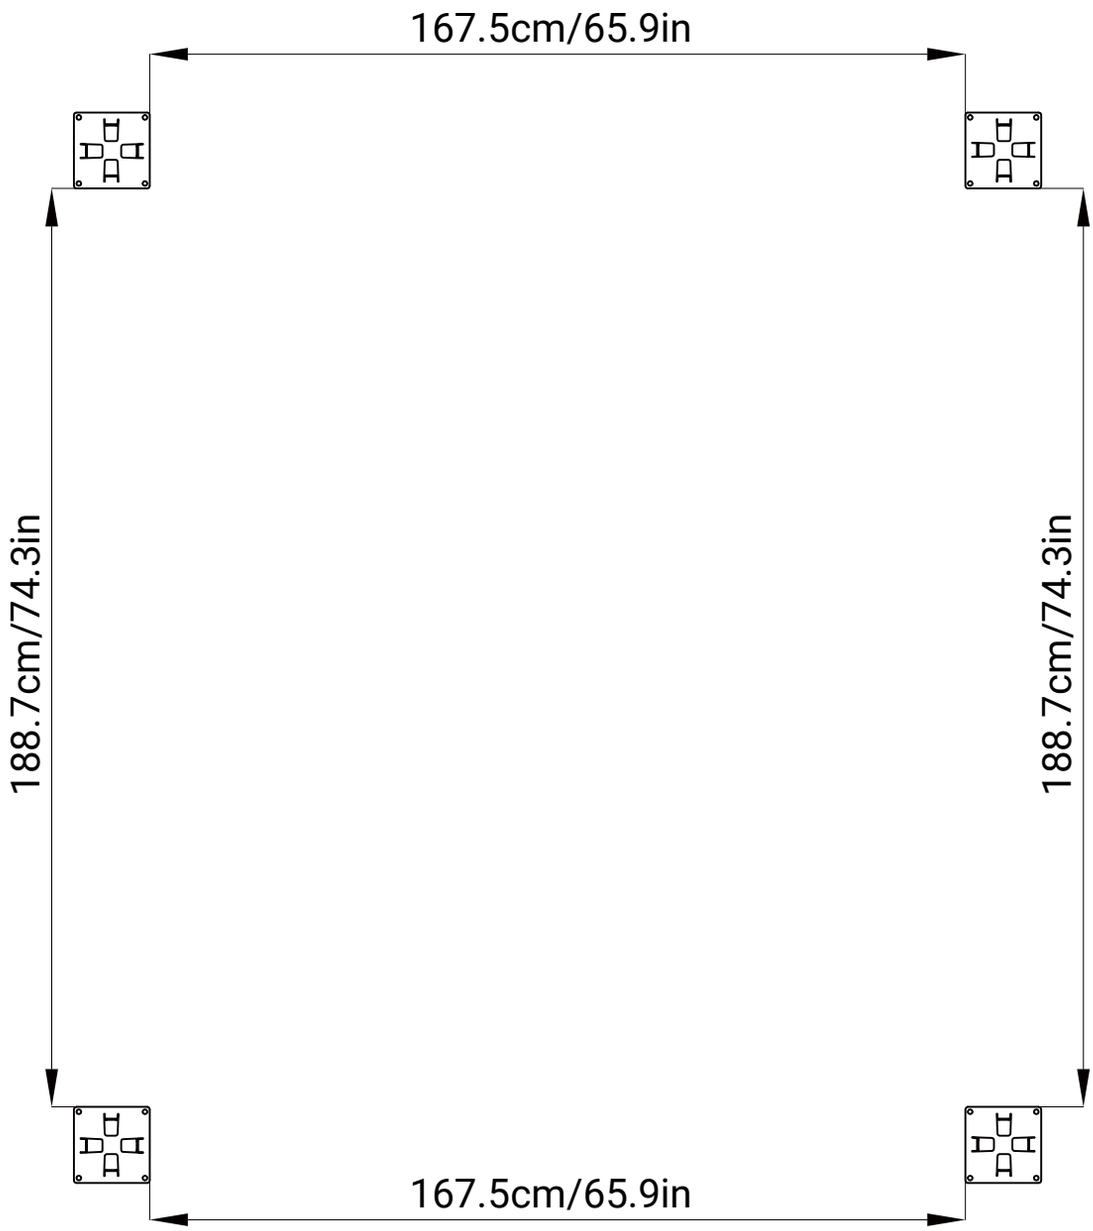

4.Use a square to check: Before tightening the bolts, check that the assembly is square.

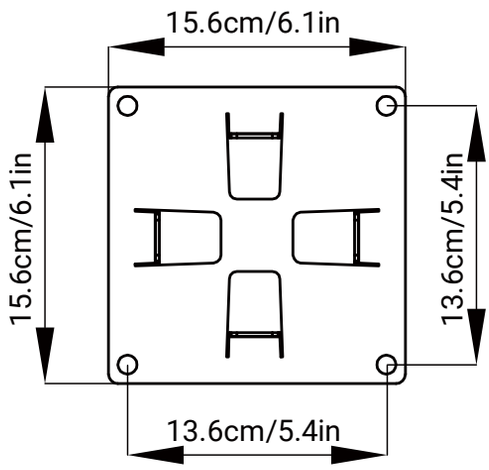

5.Do not overtighten the mounting bolts. Overtightening can cause the wood to crack, splinter, and result in other structural damage.
