CUSTOMER SUPPORT

Dear customer
Thank you for your purchase.

This product is a non-permanent outdoor structure designed and manufactured for personal use rather than commercial use.
Please confirm whether the installation is permitted in your states firstly.

1. When you receive the product, please make sure that all the boxes have arrived,and all the parts are intact.
2. Please browse the entire installation manual before assembling, retain this instruction manual for future reference.
3. If any problem occurs unsatisfactorily as follows:
   - Lack of boxes, or some boxes are not arrived.
   - The outer box is damaged.
   - The product is damaged / bent / cracked while you open the box.
   - The parts / accessories / assembly tools are missing.
   - The product is hard to assemble.
   - The instructions are not clear, or hoping for assistance with installation.
   - The product has functional problems.
   - The product did not meet your expectations.
   - Other aspects that you are not satisfied with.

Please feel free to contact us for help firstly. If there is any damage, please send us clear photos. We will check and do our best to provide the best solution for you. The missing or damaged parts will be delivered to you within 5 days.

Important Attention:

Please read these instructions fully before starting assembly.
1.. Make sure you have received all the parts. If any parts are missing, please let us know the letter of the parts you need.
2.. If there is any damage, please send clear photos to us, and we will check and offer you the best solution soon.

Please read the following directions carefully.

Electrical Requirements

Each sauna will require a exclusive circuit when plugged in an outlet. A exclusive circuit requires that no other appliance to share the outlet/circuit with the sauna. Failure to comply with this requirement may cause electrical interruption and diminished performance.
Please make sure the sauna is properly grounded. Serious injury may result if proper electrical requirements are not met.
It is recommended that a qualified electrician install your dedicated electrical wiring for proper sauna functionality and to avoid any potential electrical hazards.
Your sauna plugs directly into 220~240V, 20 Amp dedicated outlet.

It is recommended that a qualified electrician install your dedicated electrical wiring for proper sauna functionality and to avoid any potential electrical hazards.

Package Information

This sauna are packed in 1 carton, please make sure that you open the boxes face up.

Please be very careful when opening boxes, due to fragile parts and glass.
The sauna installation requires at least 2 people,and more people if the sauna cabin is big and heavy. You should not try to install the sauna on your own as damage will easily occur.

Where to Start

Lay the cartons flat on the ground and open them carefully.

Open all the cartons, start to install your sauna pleasantly.

Tips: Before the start of installation, or at least before installation of the top panel, please remove the dust-proof cover (only indoor sauna) cover from the top panel to take out the accessories and screws etc.

Cautions to Installation

1- No plumbing or plumbing fixtures should be placed in the sauna.
2- Keep all liquids away from the heating panels
3- Install the sauna on a completely level surface.
4- Install the sauna in an area that is dry and protected from the weather.
5- Flammable objects and corrosive chemical substances should be kept far away from the sauna.

Installation Procedure

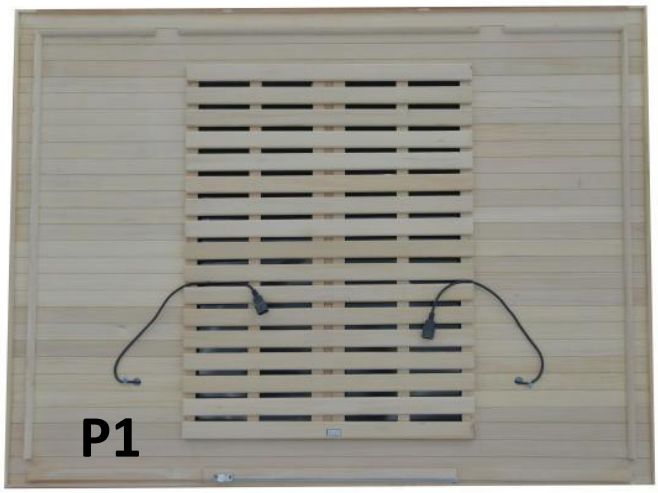

★In order protect salt brick we add PP bag outside. When you install sauna rooms, please remove the PP bags of salt bricks firstly and install side panels again.

●Before step 1 or step 2, place the rear panel(P1) on ground, unscrew the cover frame, take out every salt stones and remove PP bags, then put the salt stones back one by one, finally install the cover frame back well. Then it can be used normally. Please refer to the relevant pictures.

Suggestion: If this sauna room is to be used immediately after installation, the salt panel can be removed and reinstalled. If the customer only installs the sauna room but does not use it for the time being, we suggest not removing the bags of the salt panel. Because the salt panels are natural salt stones, if they are not used for a long time and are in a humid environment, they will melt.

Step1,P1 Floor panel

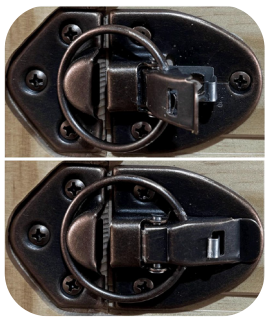

●Firstly Place the floor panel (P1) flat on your desired place.The Floor Panel is leveled to indicate front vs.back.To prevent damaged grounds do not move around after assembly; prior to assembly, select a location within reach of power outlet, and pay attention to the orientation of the door to make sure nothing will block it.

Step2, P2 Rear panel

● Place Rear panel (P2) properly on the rear edge of floor panel. Please note that the bottom joint should be aligned.

Step3, P3 Left panel

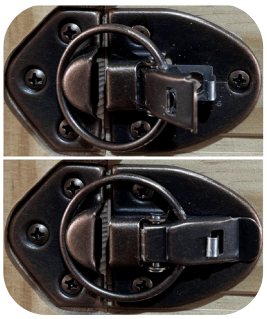

- Install left panel(P3)to the rear panel(P2).
- Need one person hold the Rear Panel in place while you position the Left Panel,Panels(walls) are fastened by buckles.

Step 4, P4 Right panel

- Install Right panel(P4).
- Need one person hold the Rear Panel in place while you position the Right Panel,and fasten by buckles.

Step 5, P5 Bench support panel*2

●Install Bench support panel (P5)*2

●Insert the Left and right Bench support(P5-1&P5-2) into the notch to hold it in place,and connect the wires for heaters.

(Tips: The bench support panel of left and right are different,please install according to the label which sticked on the bench support panel.)

Step 6, P6 Baffle panel*2

●Install Baffle panel (P6) *2

●After installing the baffle, please fix them to the left panel and the right panel (P6-1&P6-2)respectively with screws F4 M3.5*30mm(x4)

(Tips: The baffle panel of left and right are different,please install according to the label which sticked on the baffle panel.)

Step 7, P7 Seat panel*2

●Install Seat panel (P7) *2

Tips: The seat panel of left and right (P7-1&P7-2) are different,please install according to the label which sticked on the seat panel.

Step 8, P8 Ceiling panel

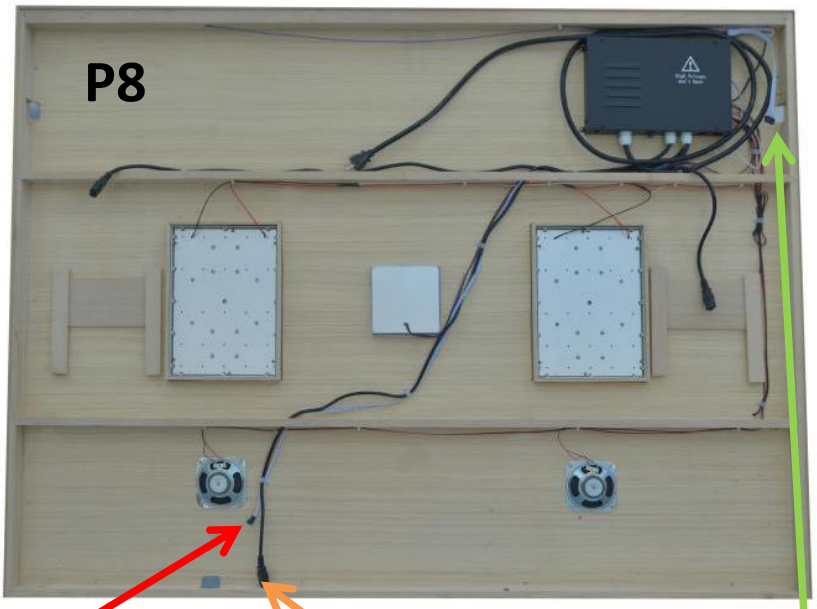

●Install Ceiling panel (P8) *2

●Please draw the wires on top of rear panel, left panel and right panel via the holes to the ceiling, and connect the 3 groups of wires one by one(next page).

connect the 3 groups of wires one by one

Wires of Red beauty lamps*1

Wires of heaters*3

Wires of control panel*1

(Tips:There are three wires for the heater. Please connect them in sequence)

Step 9, P10 Front panel(Glass)*3

- Install Front panel (Glass)(P10) *3
- Please install right side glass(P10-3) firstly,then install left side glass(P10-2),and finally install glass door(P10-1),please kindly note that the glass requires accurate embeddings inside the top and bottom grooves,this process requires a slight elevation of the top plate to help assemble the glass,and a person is required to carefully hold the other glass to prevent bump against and displacement.Please check the method of install glass door as above pictures.
- Use Hexagonal wrench(F1) to operate the related process.

Step 10, Install Hinges for Glass Door

Install process of hinges for glass door(all front models)

*Use Hexagonal wrench(F1) to operate the related process.

1.Unscrew

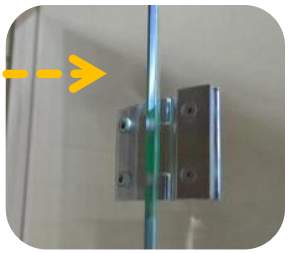

2.Take away

3.Aim at the holes on right glass(P10-3)

4.Get into the holes well

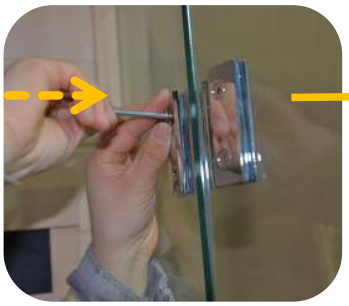

5.View from inside cabin

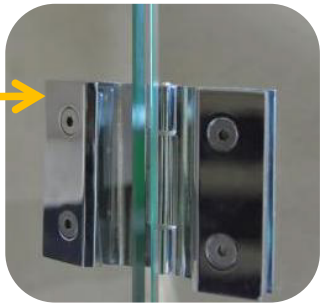

6.Put back

7.Put screws

8.Fix the screws

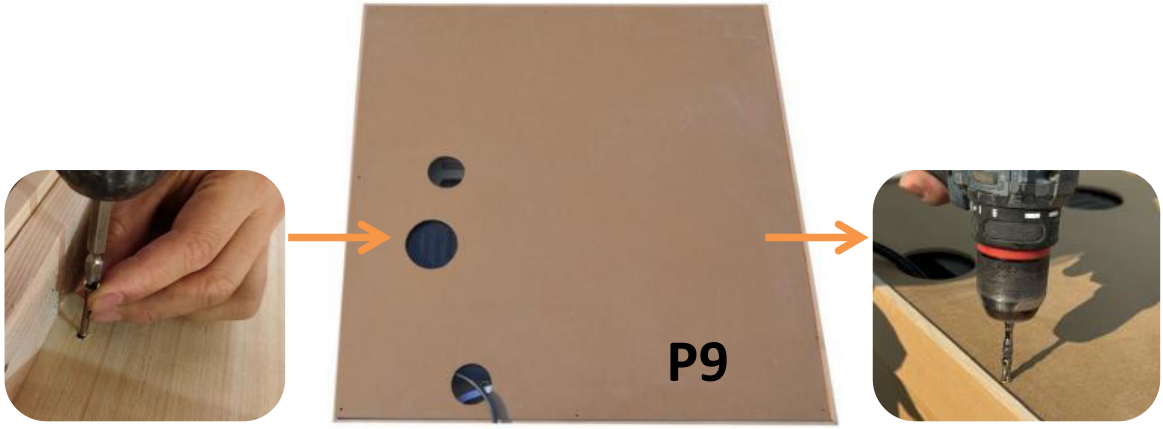

9.Finished

Step 11, P14 Sealing strips*2

●Install the Sealing strips*2(P14)on both sides of the glass door.

Step 12, P9 Dust-proof cover

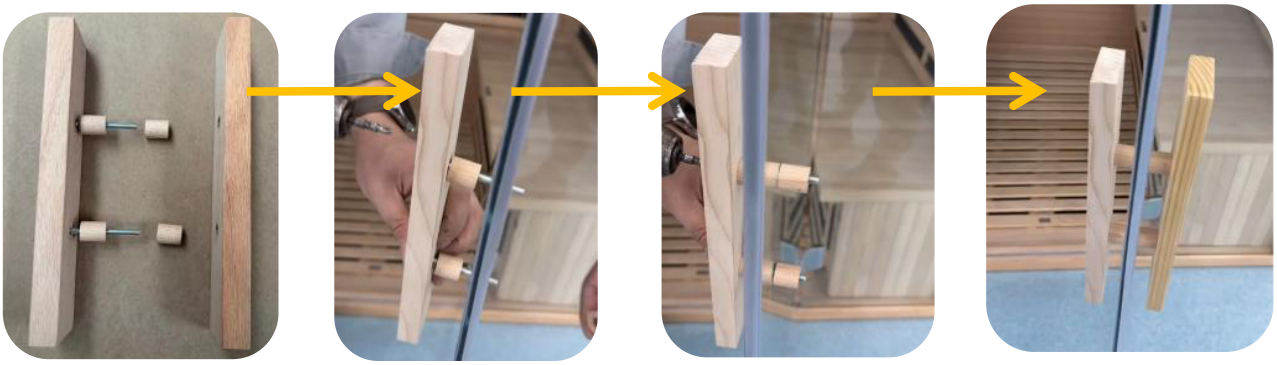

●After assembling the glass, it is necessary to fix the ceiling panel and the side panel on the ceiling panel according to the drilled holes' positions with screws F4 M3.5*35mm (x9), so as to ensure the stability of the glass.

●After assure all the functions work well, install P9 Dust-proof cover with screws F2 M3.5*16mm(x8). Don't forget to draw the power cord out of the proper hole.

●Tips: You can use a screwdriver insteading of the electric hand drill. If you do want to use an electric hand drill, please prepare it on your side.

Step 13, P11 Door handle

●Install Door handle(P11) to the glass door with suited screws.(Door handle is placed in the P8-ceiling panel).

●Unscrew to apart the handles, ready to assemble on glass door.
(Tips: Please install the half handle painted outside, and the half handle without paint inside the cabin.)

Accessories

These accessories are placed inside the P8-ceiling panel.

Step 13, Install P12 Cup holder in any corner with screws F3(M3.5x25mm)*2.
Do Not install it on or in front of heaters. If you don't like or there is no anywhere suitable to install, just ignore it.

Step 14, Install P13 Towel Rack in any corner with screws F5 (M3.5x40mm)*2.
Do Not install it on or in front of heaters. If you don't like or there is no anywhere suitable to install, just ignore it.

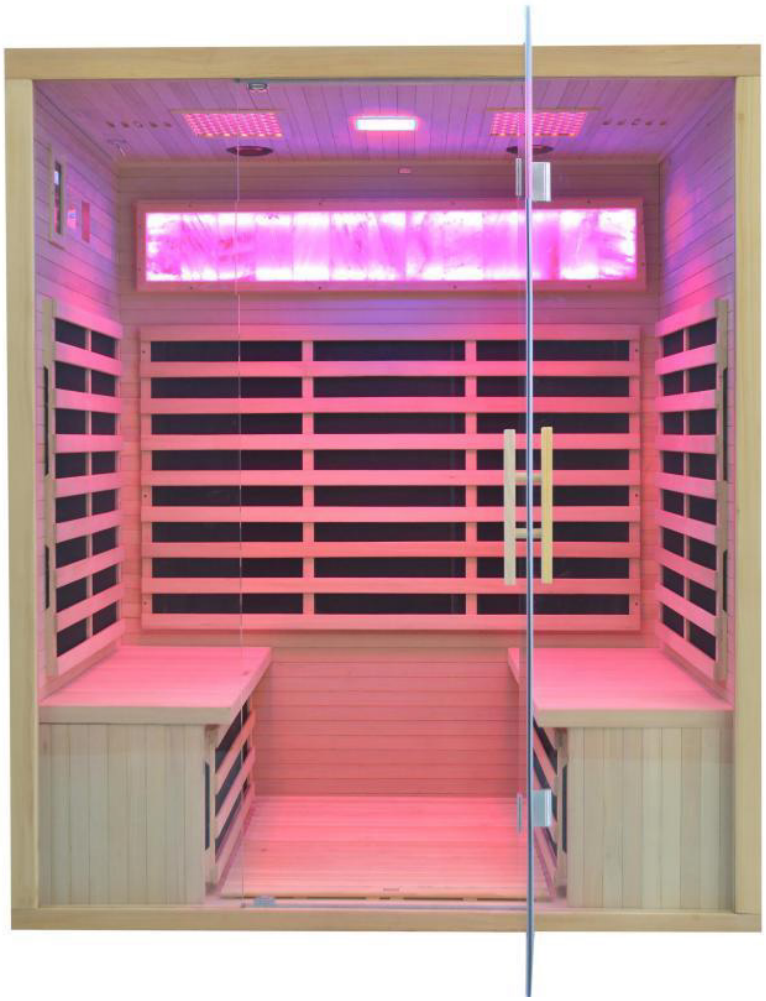

Glasses for red beauty lamp(P15)
When using red beauty lamp for this, put on the glasses or no staring at the lamp to prevent your eyes from hurt.

When heating, keep the vent closed.

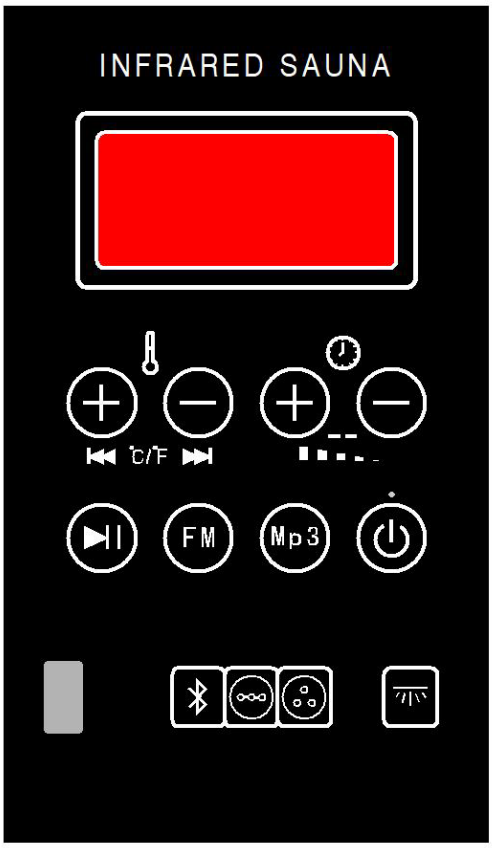

Vent

Finished Installation

Operation Instructions of LCD Control Panel

(Available for indoor sauna 1-person model.)

Power Button (On/Off)

This button turns the sauna on or off.

MP3 Switch Button

Insert USB device into the USB port, then press this button to switch to MP3 mode.

FM Switch Button

Press this button to switch to FM (Radio) mode.

Music Control (Play/Pause)

Press this button to play or pause when it is in MP3 mode.

d, If the signal between driver board and control panel is abnormal, it alarms 3 short beep every 2 seconds.

e, If the input voltage is too low, it alarms 4 short beep every 2 seconds.

f, If the wire connection for left loudspeaker loosen, it alarms 1 shot beep and 1 long beep every 2 seconds.

g, If the wire connection for right loudspeaker loosen, it alarms 1 long beep and 1 shot beep every 2 seconds.

Usage Guide

Conditions to use the sauna:

1, Temperature range: +5~+40 ℃(41-104 F degrees).

2, Relative humidity: ≤85%

3, Depression: 700-1060 hPa

4, Main supply: AC 220V or 240V Frequency 60Hz ±1

Allow your sauna to warm up for 15-20 minutes or until it reaches 43℃ (110 F degrees). You may close the vent on the ceiling to speed up the preheating process.

Drink plenty of water to avoid dehydration during or after the sauna using. It is better not to exceed 40 minutes one time.

Tips:

- Start using the sauna within 10 ℃ before it reaches the set temperature in order to receive the most benefits of the infrared heaters. For example, if you set the sauna to 52℃ (125 F degrees) , you'd better start using the sauna when it reaches 46℃ (115 F degrees) or 2-3 ℃ less. Customers reported an average use temperature of 52 ℃ (125 F degrees) .

Precautions to Use the Sauna

- If the temperature becomes unbearable, decrease the temperature or shut off the sauna immediately.

- Do not use if pregnant or have serious inflammation, a fever, a communicable disease, acute bleeding, or intoxicated.
- Concern the temperature if using the sauna with the elderly or children. Children need adult to accompany when using the sauna.
- Do not consume alcohol or drugs when using the sauna.
- If using prescription drugs, please seek advice of a personal physician or a pharmacist.
- Individuals with cardiovascular conditions or problems (hypertension / hypo tension), congestive heart failure, impaired coronary circulation, which might affect blood pressure, should exercise extreme caution when exposed to prolonged heat.
- Chronic diseases such as Parkinson's, Multiple Sclerosis, Central Nervous System Tumors and Diabetes with Neuropathy are conditions that are associated with impaired sweating.
- The use of Infrared saunas should be avoided by anyone who is predisposed to bleeding.
- An individual that has insensitivity to heat should not use any type of sauna.
- Heating of the low back area of women during the menstrual period may temporarily increase their menstrual flow.
- If have a recent acute joint injury, it should not be heated for the first 48 hours after an injury or until the hot and swollen symptoms subside.
- Metal pins, rods, artificial joints or any other surgical implants should consult a surgeon prior to using an Infrared Sauna.
- Do not splash water on the heaters or any electrical component inside the sauna.
- Do not bring wet towels into your sauna or any substances that could harm the interior of your sauna.
- Do not install a lock on your sauna.
- All repairs need to be authorized by the supplier‘s representative; otherwise product warranty may be voided.

In the rare event, you feel painful and/or discomfortable, immediately discontinue sauna use.

Cleaning and Maintenance

Use a clean damp towel to wipe off the bench, floor and around the back panel.

Do not use a towel that is too wet and can drip water inside the sauna and do not use cleaning agents inside the sauna.

Make sure to keep the sauna dry and clean. Do not leave towels or water glasses or bottles inside the sauna after use.

Wipe the exterior surface of the sauna with a towel and clean the glass at least once a month.

Wood Care

If the sauna exterior body was scratched or scuffed, it can be concealed by using a small amount of furniture polish, oil or other furniture treatment.

The interior blemishes, scratches, or scuffs can be either left alone, sanded or combination of gluing plus sanding.

Please avoid any treatment containing benzene or a high concentration of alcohol.

Troubleshooting

The sauna does not power on

- Make sure the main power plug of the sauna is connected to the socket at your home.
- Make sure the main power plug is connected to the electric box on the top of sauna.
- Make sure the overload protector did not turn off.
- Make sure the control panel wire is connected well.
- Make sure the power socket at your home is working by trying a different device on the same socket.

Control panel displays abnormal or has malfunction

- To make sure whether the wires for control panel connected well. There are 3 connections of the wires: to the control panel, to the

circuit board, middle connection on roof.

- Replace a new wire for control panel.
- Replace a new control panel.

LED Reading Light

- Make sure the wires connect well.
- Replace the light bulb.

Color therapy light does not work

- Make sure the wire is connected well.
- Replace a new therapy light.

One or a few heaters do not work

- Make sure the heaters' plugs connected well on top of the sauna.
- Make sure the heaters' plugs under the bench are connected well.
- Floor heater and bench heater are not as hot as other heaters (by design).
- Make sure the plug behind the heater is connected (you would need to unscrew the heater).

For more troubleshooting advice or to report a problem, please contact with your supplier.
