Warranty information

The manufacturer is proud of its high standards of quality and workmanship that go into our products. The customer is protected by the following limited warranty, which applies to seats under normal indoor residential use. This warranty does not apply to seats used for commercial, institutional, or other non-residential uses.

365 days LIMITED WARRANTY: The manufacturer provides (1) 365 days of comprehensive coverage for all components such as materials, foam and frame parts, and mechanisms, including motorized parts from defective materials or workmanship.

MATERIAL: Normal fabric fading, shrinking, or stretching is not covered by this warranty. Similarly, the natural markings, stretching, and shrinking of leather are a proud mark of authenticity and therefore not covered by this warranty. Evidence of improper cleaning, abuse, or abnormal use of the materials will void this warranty.

FOAM AND FRAME PARTS: The manufacturer warrants these components for 30 days from time of delivery against manufacturing defects. Foam compression is natural and therefore not covered by this warranty.

MECHANISMS: The manufacturer warrants these components for 30 days from the time of delivery against manufacturing defects. After the warranty period, the customer is responsible for inspection, labor and transportation costs.

No warranties, express or implied, apply after the expiration of this Limited Warranty, The warranty period covers repair, substitution, and replacement. No returnsor refunds are covered, A proof of purchase is required to service a claim; simply present the bill of sale to the dealer from whom the item was purchased to request warranty service. The manufacturer is not liable for incidental or consequential damages occurring outside the terms of this warranty, even if advance knowledge of such damages was possible.

Tips for caring your
Caring for your Leather Sofa

Try to maintain at least 1 feet between your furniture and heating sources.Prolonged exposure to heat vents or radiafors will cause your leather to dry out, to crack or to become hard.

Avoid placing your furniture in direct sunlight. All materials will fade over time when placed in direct sunlight. Aniline leathers are especially sensitive to sunlight. Do NOT place aniline leathers in windows or under skylights!

Do not allow your pets onto your leathers sofa. Pets have sharp claws which can scratch the leather. Their saliva is very harmful to leather as are their other body fuids and oils.

Never use harsh chemicals or paint around your leather sofa.Keep materials like fingernail polish, bleach,nail polish remover,glue and household cleaners away from your leather. Always cover your upholstery before using these chemicals.Avoid ALL products containing solvents or oils, as they will adversely affect the surface of the leather.
