BARN DOOR HANDLE DOOR PULL INSTALLATION GUIDE

The location of where you attach your door pull is up to you. We suggest you don't attach your door pull too close to the edge of your door or a seam, as this would weaken the integrity of your door. Typically, we recommend that the center of your door pull be lined up 3' from the bottom of a standard Urban Woodcraft Barn Door. If you have any questions regarding installations email info@urbanwoodcraft.com
