

Thank you for purchasing the Integrated Ceiling Fan with Remote. This manual will guide you through the setup and operation of the product. Please read the instructions carefully before using the bulb.

## Product Specifications

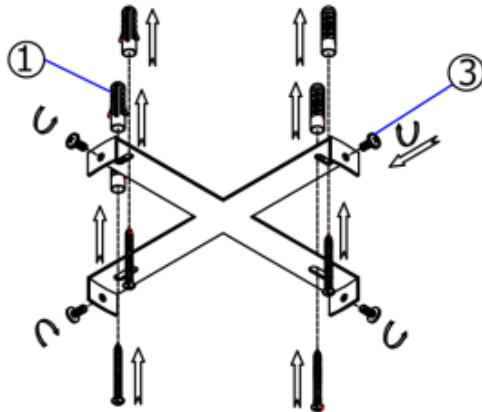

Material:	Metal, aluminium, plastic
Colour:	Matt black
Light Source	LED
Fan Wattage:	20w
Colour Temperature:	3000K (Warm white)
Lamp Holder	LED
Bulb Life Hours	25000
Bulb Wattage	37w
Beam angle	110 degrees
Protection Class:	Class II
IP Rating	IP20 (touchproof and is resistant to dust or objects that are over 12mm in size. But has no protection against liquids)
Energy Rating	E
Weight:	1.93kg

## Safety Precautions

- **WARNING:** The intergrated Ceiling Fan must be installed by a qualified electrician in accordance with all local authority regulations.
- Proceed with caution! Before installing the intergrated ceiling fan, read through the instruction manual.including the images.
- To reduce the risk of an electric shock, do not install the intergrated ceiling fan where it will be exposed to moist environments or any liquids.
- Do not attempt to install the intergrated ceiling fan if it appears to be damaged in any way.
- Do not use the intergrated ceiling fan for any other purpose than the intended use as described in this instruction manual.
- Avoid contact with moving fan blades and ensure that hair and clothing and any other loose items are kept at a distance away from the fan.NOTE: Moving blades may result in serious injury.
- Do not operate the intergrated ceiling fan without the blades being installed correctly.
- Do not install the or touch with wet hands
- Do not look directly at the light source.
- Do not place any object on the ceiling fan/blades.
- The Intergrated Ceiling Fan is not intended to be used by children or persons with reduced physical,sensory or mental capabilities or persons who have a lack of experience installing electrical items.
- It is normal for the motor and lights to become hot. Do not touch the item during or after use.

## Installation Guide.

- **Warning!** Before installation, make sure to turn off the power supply, failure to do so will cause an electric shock.
- **Warning!** Please ensure that the voltage of your home meets the working voltage of the item.
- **Warning!** The fan remains powered on even if it has been switched off through the remote control. Therefore do not touch the integrated ceiling fan until you are absolutely sure the power has been cut off.
- The installation height of the integrated ceiling fan should be more than 2 meters from the floor.
- Before starting the installation, please check that all contents are present and that there are no visible defects or damage to the integrated ceiling light.
- Attach the ceiling mounting base with the four mounting screws and ceiling plugs (provided) as shown in the image below.

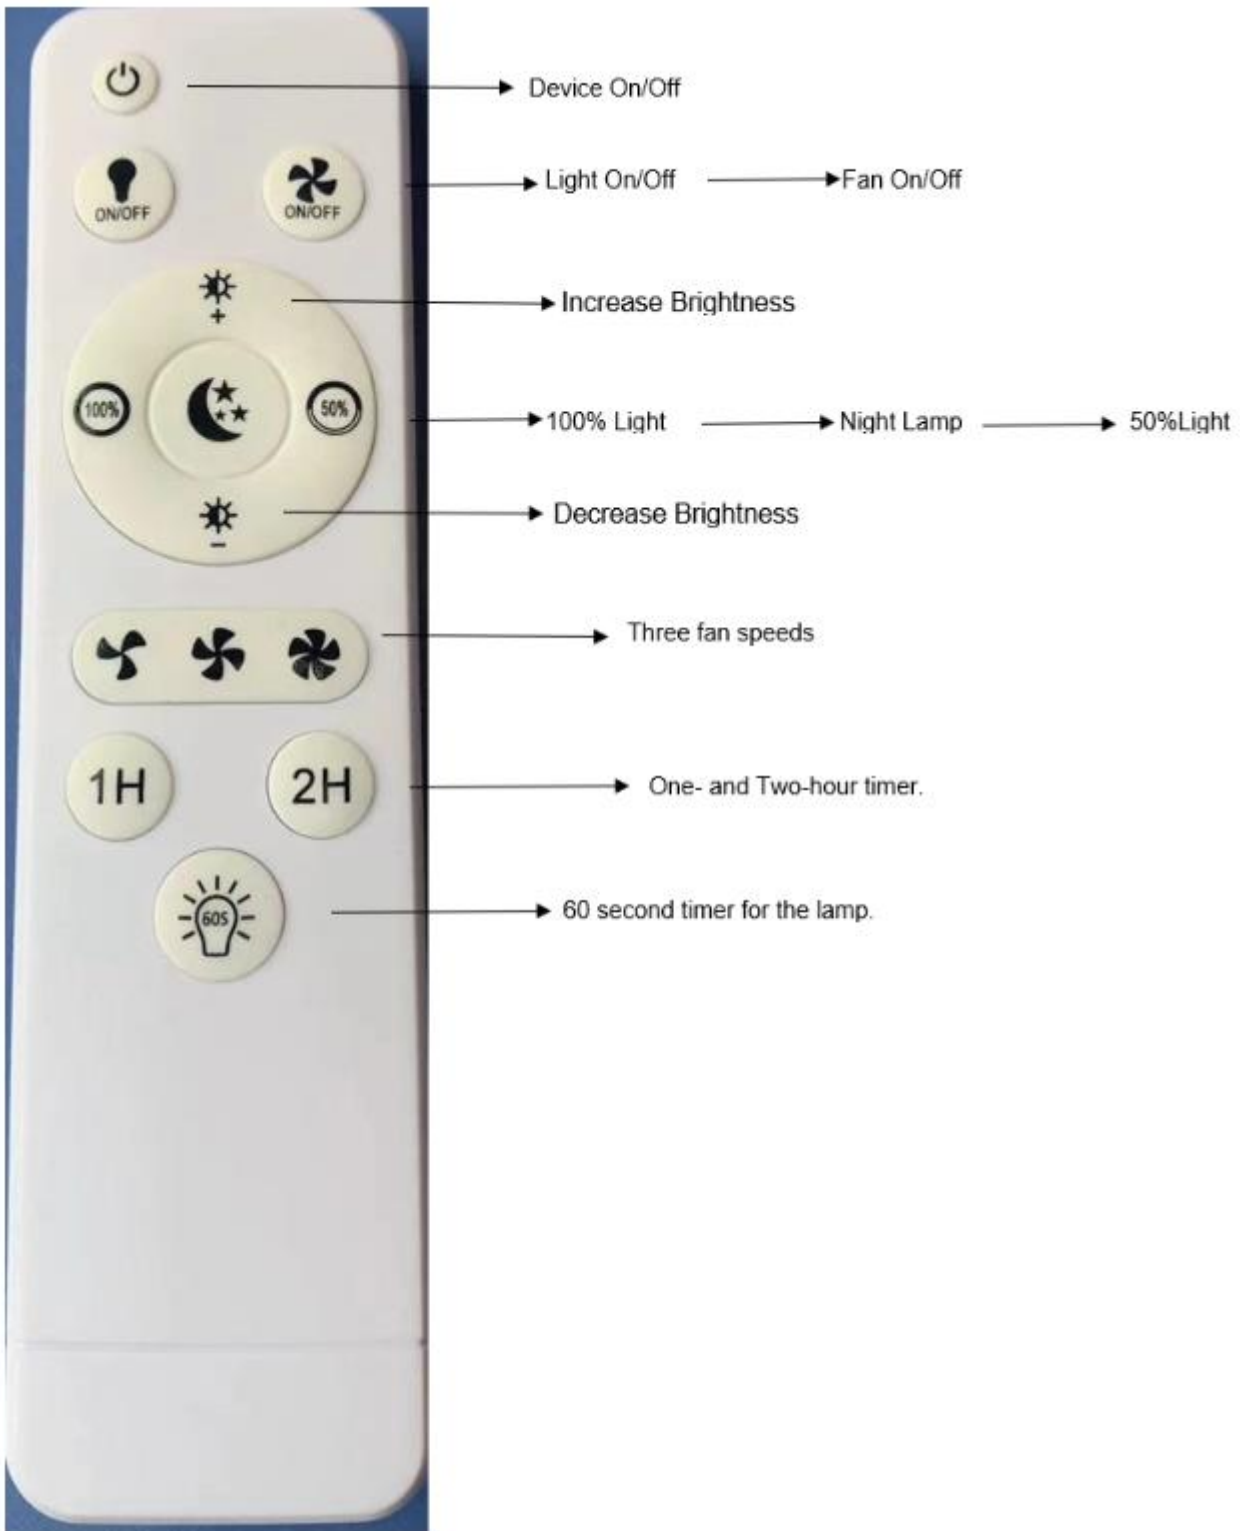

**NOTE:** It is recommended that another person helps with the third step of the installation.

- Unscrew and remove the ceiling bracket. Leave the screws in a safe place as not to lose them.
- Fix the bracket into the hole of the ceiling and secure with the four screws. (If there isn't a hole in the ceiling, then please use an electric drill to create installation holes in the ceiling and insert the four plugs before securing with the four screws).
- Before commencing the next step. Please ensure that the power is switched off before wiring!
- Have someone hold the ceiling fan whilst you begin the wire connection.
- Carefully open the small white box and insert the blue (neutral) and brown (live) wires through the black sheath and secure both wires. Make sure both colours are aligned with the same coloured wire (blue to blue – brown to brown) to LED fan. Secure the black sheath before closing the white box.
- Hold the edges of both sides of the ceiling fan with both hands and install in the screws back into the ceiling bracket. The item base should now be firmly secure and not be able to rotate.

The installation is now complete.

- Please switch on the power and test all the functions by using the remote control.
