

## Attention Installer

1. Read these instructions carefully before installation. Inspect sink for damages. Do not install if the sink is damaged.
2. **Oakalnd** recommends that installation of apron / farmhouse sinks be done by a professional installer.
3. **Oakalnd** is not responsible for improper sink or countertop installation. **Oakalnd** is not liable for any damages to sink or countertop or personal injury during installation.
4. Due to the special nature of this installation, **Oakalnd** recommends that an experienced cabinet maker use the actual sink to build a custom cabinet or modify an existing cabinet.
5. Observe all local plumbing and building codes.

Alignment of sink to cutout is critical for a superior fit and finished look. Depending on your aesthetic preference, **Oakalnd** sinks can be installed either with a 1/4" reveal, flush fit, or with a negative reveal. 1/4" reveal is recommended. Decide on your preference prior to installation.
