

# INSTALLATION INSTRUCTIONS

Thank you for purchasing our products

Please read the installation instructions carefully before  
**About the lampshade**

1. The lampshade is handmade. Unlike mechanical production, the welding wire cannot be very uniform (there will be intermittent or uneven height).
2. When you receive the lamp, you may feel that the glass cover is oily. This is a necessary process for our type of lamp before shipping (to prevent the black welding path from being oxidized and turned gray). Please don't use detergent or laundry detergent to clean it, take it out and let it evaporate naturally for two days or wipe it gently with a soft cloth, Later maintenance can be wiped with water wax or vegetable oil.
3. Many friends feel that the lamps are not like glass (especially those with larger glass sheets, the glass is big, and the sound when knocked on is rather dull. They don't have the same crispness as window glass, so they think it might be resin, plastic, acrylic, etc.).

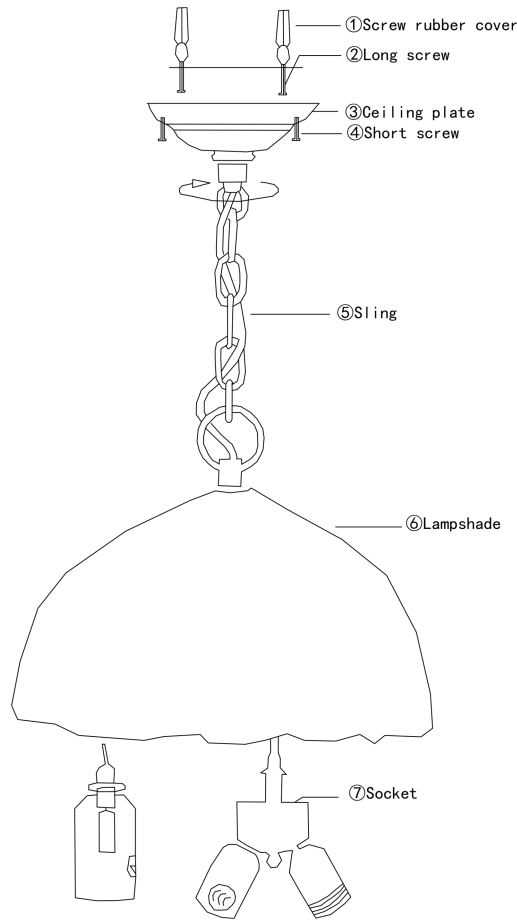

## Determination of glass

- ① Send to a professional testing agency for testing;
- ② Use a lighter to burn the glass on the inside of the lampshade. Plastic, acrylic, etc. will definitely not withstand this temperature. Our lamp is soldered with a soldering iron and can fully withstand the fire;
- ③ Scratch the inside of the lampshade with a sharp weapon.

## Precautions for installation and use

1. Please read this manual carefully before installation;
2. Please disconnect the power supply during installation;
3. When installing this product, do not disassemble or move any spare parts;
4. If you need to replace the light source, please first check the label near the base and lamp head of the lamp, and refer to the instructions in the instruction manual to ensure that the product is used within its required range; otherwise, the product may be damaged and safety accidents may occur; please disconnect the power supply first and wait. Do this after the bulb has cooled down (especially incandescent bulbs);
5. It is strictly prohibited to use such products in a humid environment.
