

## ASSEMBLY INSTRUCTIONS

---

*Tips: wipe it gently with a damp cloth and the water in the fountain needs to be changed regularly*

**Step 1:** Remove the fountain from the box; place the product on a level surface.

**Step 2:** Attach the bird bath to the top of the base (as indicated by the red arrow in the picture). It needs to be snapped to correct place and turned (clockwise to tighten, counterclockwise to loosen).

**Step 3:** The LED light is pre-installed in fountain. Plug the LED light into the pump(A). Put the power cord through the white PVC tube then pull out the power cord from the base notch

**Step 4:** Adjust the power cord in the birdbath. Pull the power cord out from the bottom and secure it at the reserved small outlet.

**Step 5:** Connect the PVC plastic tube to the outlet nozzle of pump (A). Place the pump (A) flat inside the bottom of the rock.

**Step 6:** After installing the power line, attach the Lid to thePVC pipe and power line to prevent water from overflowing from the birdbath.

**Step 7:** Insert the two small birds into the top of the rock.

**Step 8:** Fill the basin with clean water. Make sure the pump (A) is completely submerged in water. In order to have best effect; the water level should be 3/4 inch (2 cm) below the top of the basin.

**Step 9:** Plug the pump power cord in the wall outlet to run the fountain.
