

Unique Floor Tile

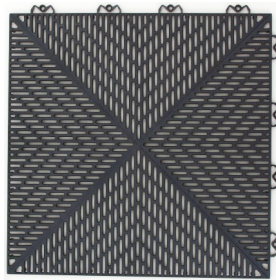

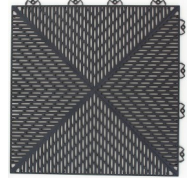

- Ultraviolet-stable, interlocking, loose-laid flooring
- Perfect for both indoors and outdoors
- Attractive, durable and practical
- Easy to install
- No special surface preparation needed
- Withstands loads to 12,000 lbs. per tile

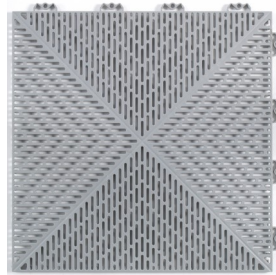

- ***What are Unique Garage Floor Tiles?***
- Your unique tiles are the “Rolls-Royce” of interlocking floor tiles. They are made of tough polypropylene plastic and measure ~15” square and 3/8” thick. They click together to form a seamless floor surface. The unique design means the floor is supported on a framework of legs which allow it to carry heavy weights and at the same time provide a cushion effect.
- ***What are Xpand Tabs?***
- Unique All Weather Floor Tiles feature our exclusive, built-in Xpand Tabs, which connect the tiles together, absorb tile expansion with changes in temperature, and eliminate “tile buckling” common to most other tile systems.
- ***Where can the tiles be used?***
- Tiles are for both indoor and outdoor use. Install them in your garage, storeroom, laundry room, sauna, mudroom, balcony, patio, pool area, terraces, decks, porches, indoor and outdoor shower areas, locker rooms, basements, office space and more.
