

Assembly Instructions for Pendant Lights

This product must be installed in accordance with the applicable installation code by a person familiar with the construction and operations of the product and the hazards involved.

Please follow the steps and the diagram for assembling your PENDANT LIGHT(S) and make sure electricity is OFF during assembly.

You should have received: A: Fixture with bracket bar and insulation, B: Glass, C: Orange Wire Nuts, D: 2 Short Screws, E: 2 Long Screws

1. Place the insulation inside the J box, then install the bracket bar over the insulation and in your J box.
2. Place the A: Canopy over your J box. Attach white wire to the white and the black wire to the black.
3. Use the two C: Orange Wire Nuts that were provided to cover the wires by twisting them onto the ends of the wires.
4. Use the either set of provided screws: (D: Short Screws or E: Long Screws) to attach the canopy to the bracket bar.
5. Place the B: Glass over the socket and use the provided metal F: Ring to secure the glass. Screw the ring onto the socket.

IMPORTANT NOTE: MAKE SURE TO SCREW THE RING ONTO THE GLASS SNUG, **BUT NOT TIGHT.** The glass will need room to expand and contract with the heating and cooling of the bulb.

This diagram is for Nickel and Black hardware

A: Canopy Fixture
