### Product Specifications:

Name	Specification
Suitable age	18 - 36 Months
Loading capacity	25kg
Product size	94*34*85 cm

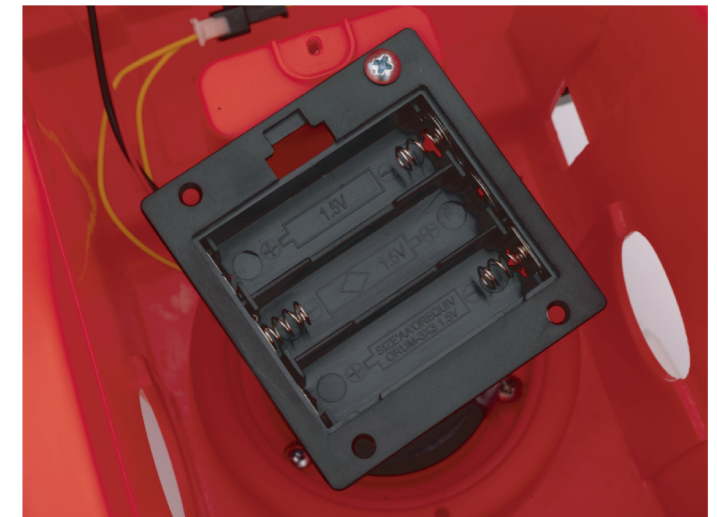

## Function

### Button function

- ① Start switch
- ② horn
- ③ Music

## Battery

Please purchase 3pcs AA batteries by yourself, open the bottom of the seat, and place the batteries in the battery compartment.

**WARNING:** The toy is to be assembled by an adult. In its unassembled state, the product contains potentially hazardous sharp points, sharp edges, and small parts. Therefore, please ensure it is kept out of reach of babies and young children.

**Warning :** Not to be used in traffic.

## Step-by-step Installation Diagram

### 1. Install the front bumper

Snap the front bumper into the corresponding position and tighten it with 2 screws.

### 2. Install the steering rod

Put a large spacer on the steering rod and insert it into the corresponding position as shown in the picture.

### 3. Install the front wheels

As shown in the figure, place a spacer first, and then fix it with a starter pin after putting on the wheel and spacer. Finally, press the wheel cover clamp tightly.

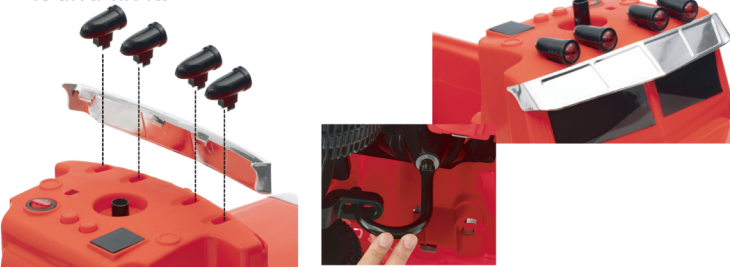

### 4. Install the rear wheels

As shown in the figure, the rear axle is sleeved with a gasket and a casing, inserted into the body, and then the wheels and gasket are set, and then fixed with a cotter pin, and finally the wheel cover can be snapped.

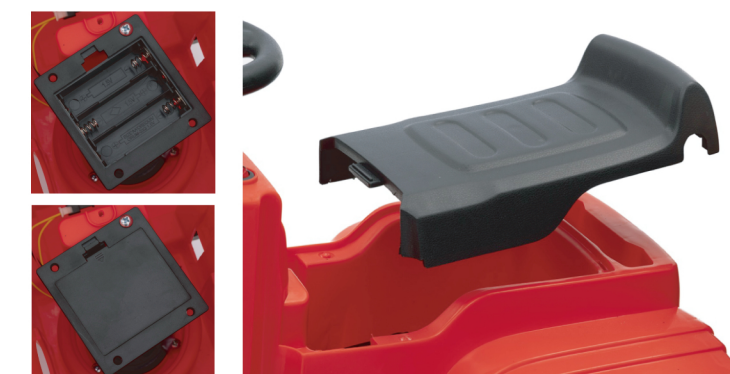

### 5. Trim and steering wheel are installed

As shown in the figure, install the steering wheel on the corresponding buckle position card such as the head-mounted decorative lights, push the steering lever at the bottom of the car to the front direction, and then press the steering wheel sleeve to the steering rod up and down, align the hole in the middle of the steering wheel with the hole on the steering rod, and then use the screw rod to penetrate it and fix it.

### 6. Install the battery

Open the battery cover under the seat and add 3pcs AA batteries.

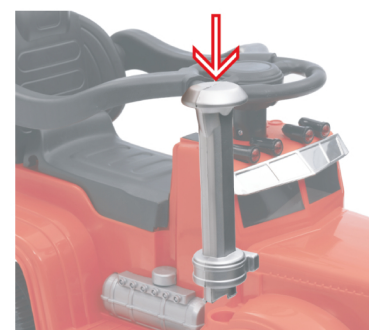

### 7. Install the push-bar assembly

Assemble the backs and armrests as shown in the figure. During installation, please make sure all accessories are tightened.

### 8. Installation of body trims

Plug in the body trim as shown in the picture.

### Warnings

For children's safety, please read these carefully. Assembly and adjustment must be done by adults, to keep children away. Keep children under 36 months away from small parts. A safe belt is a must when children playing. Do not be close to fire. Adults must teach how to play it and never leave children alone to play children away from plastic bags, or suffocation may occur. Only use spare parts provided by the manufacturer. Maximum loading capacity is 25 kg. Do not overload—suitable age: 18 - 36 Months.

### Safety use

Do not play in the street, road, slope, or ditch.  
Do not change the line or add the electronic device to the car.  
Play the car in a dry area, not wet.  
Keep away from fire, or may damage the line.  
One or two riders one time only. Do not overload.  
Maximum capacity is 25KG.  
Turn the power off if no use. If long time no use, unplug battery line.  
If any problem, please fix it before playing.

### Maintenance and Service

Use lubricating oil to care for iron parts. Keep the car away from fire and sunshine, Park it in an even place, not reversal or gradient.  
Park it indoors and cover it with waterproof cloth.  
Keep the car away from the fire, like the stove or heater, or plastic may melt.  
Keep away from flammable things, that may occur in fire accidents. Clean the vehicle with a dry cloth only. Do not use chemical solvents to wipe plastic parts. Do not wash it with water or play with it when raining or snowing. Water will damage the electric system or battery.  
Please turn the power off after each use.  
Do not change the car's structure or electric line. Check job requests for some skills or under a specialist's guidance.
