

INSTRUCTION MANUEL

Before installation

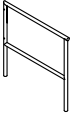

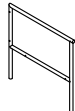

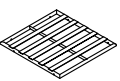

Insert the screws into the holes and tighten them, but only tighten them to about 70%-80%. Do not fully tighten at this stage. Once all the screws are in place, go back and tighten them to 100%.

If you encounter any issues, such as misaligned holes or parts that won't fit, check that the screws are correctly inserted and adjust their tightness as needed.

Customer service

Question consultation: If you encounter any problems during use, please contact us in time and we will respond to you within 24 hours.

Feedback: We value your opinions and welcome you to share your experience or suggestions with us at any time. Have a good shopping experience.
