Installation Steps

Step 1

Firstly, connect the adjustable foot and leg together.

Step 2 :

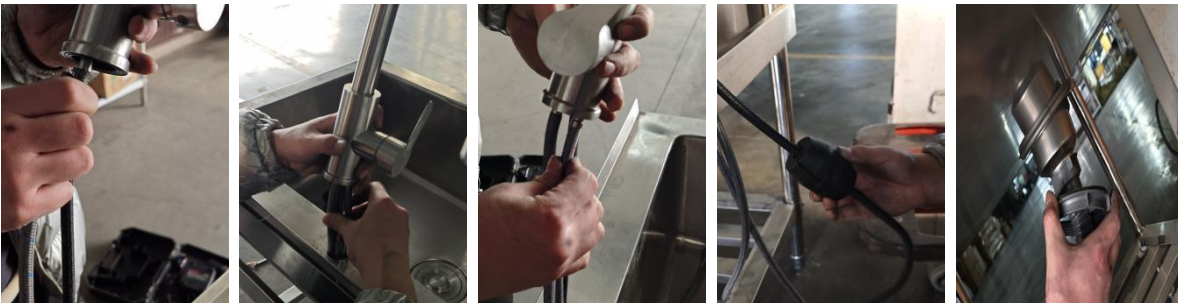

Secondly, use protective plates, washers, and long screws to connect the legs and grille together with an Allen screwdriver. All four legs are connected together in this way.

Step 3:

Install gaskets and covers for the upper and lower water outlets.

Step 4:

Finally, install the pull-out faucet at the circular hole position of the sink.

Step 5:

So the installation is complete.
