Warning

⚠ WARNING:

Risk of burning!

- **Make sure that the barbecue is standing on a flat and fireproof surface that is not made of glass or plastic.**

⚠ WARNING:

This barbecue will become very hot, do not move it during operation!

- **Always wear barbecue gloves when grilling or adjusting the vents as well as when using a chimney starter.**
- **When preparing food, adjusting the vents, placing charcoal and using the thermometer or lid always wear barbecue gloves.**
- **Grill gloves must be tested in accordance with local code.**
- **For grilling use only qualified barbecue charcoal or barbecue charcoal briquettes.**
- **Do not BBQ before the fuel has a coating of ash.**
- **Use grilling tongs with long, heat-resistant handles.**
- **Allow the barbecue to cool down completely before cleaning it.**

⚠ WARNING:

DANGER to children and pets!

- **Never leave the hot barbecue unattended.**
- **WARNING! Keep children and pets away!**

⚠ WARNING:

- **Do not use spirit or petrol for lighting or re-lighting!**
- **Never use water to extinguish the charcoal.**

⚠ WARNING:

Risk of carbon monoxide poisoning!

- **Do not use indoors !**

Information for safe operation of the barbecue

- **The barbecue must be positioned in a stable and secure surface.**

Do not use in enclosed areas or on covered areas.

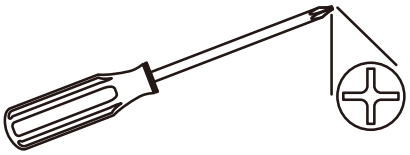

- **Only use safe lighting materials.**
- **The barbecue should be heated up and the fuel kept red hot at least 30 minutes before it is used for the first time.**
- **When barbecue is in use, maintain clearance of 36” between the hot barbecue and any combustible materials, such as beshes, trees, wooden decks, wooden fences, buildings, etc. Do not place hot barbecue under roof overhang or in any other enclosed area.**

Igniting the Fuel

⚠ WARNING:
Risk of burning!
When petrol or white spirits are ignited uncontrollable heat can develop as a result of deflagration.
You should therefore only use harmless fuel.

1. Use quality products.
2. Stack some of the charcoal or briquettes on the charcoal grill (6).
3. Place one or two solid firelighters on top of the layer of charcoal or briquettes. Ignite these firelighters using a long match.
4. Let the solid lighters burn for 2 to 4 minutes. Then fill the charcoal grill (6) slowly with more charcoal or briquettes .The maximum amount of charcoal is 1.5 kg.
5. A white layer of ash should develop on the fuel after approximately 15 to 20 minutes. This indicates that the optimal grilling condition has been reached. Distribute the fuel evenly on the charcoal grill (6) using a suitable metal tool.
6. Insert the greased grill and then you can start barbecuing.

Cleaning and Maintenance

⚠ WARNING:
Risk of burning!
Allow the barbecue to cool down completely before cleaning it.
Never use water to quench the hot barbecue. This could result in burning or scalding.

Occasional cleaning is necessary to preserve the beautiful appearance of the barbecue. Do not use any scouring agents.

1. A rinsing cloth and some water with a commercial detergent is sufficient for the normal cleaning process.
2. If the enamelled parts are heavily soiled, use a commercial enamel cleaning agent (oven cleaner). Observe the manufacturer's instructions for the cleaning agent being used.
3. Clean the grill using some washing-up liquid and a rust proof cleaning pad.
4. When you clean your pizza stone,soak it in hot water and scrub clean with a nylon brush.

Environmental Protection & Disposal

Pay attention to cleanliness when using the barbecue and dispose of waste in a clean and safe manner. As a general rule, only dispose of waste in designated metal or non-flammable containers. The local regulations for disposal apply.

Warranty
