

Upholstery

The select fabrics and materials used in our seating provide color, texture, and comfort. Preserving these details extend the life and beauty of our handcrafted pieces.

Made with various blends of cotton, linen, polyester and rayon, our upholstery falls into four cleaning codes.

- **Code X Care**
Vacuum only. Do not use any liquid cleaners, water-based or otherwise.
- **Code S Care**
Clean upholstery with a water-free product such as a dry-cleaning solvent. Water based cleaning agents (most spot-clean fabric spray cleaners) may leave rings or stain the material, so avoid their use. Consult with a professional before proceeding.
- **Code W Care**
Use a water-based fabric cleaner like Resolve to remove spills or stains. Test cleaner on a small, inconspicuous area before using. Follow cleaner instructions for best results.
- **Code W/S Care**
A combination of water-based cleaners and dry cleaning may be used to clean the material. The fabric can be spot cleaned using foam from a mild detergent, mild dry-cleaning solvent, or upholstery shampoo. Test the cleaner in a small inconspicuous area before using.
