

2*E26 Max 40W Not included

Glass Double Wall Sconce Instruction

Safety Warning

Turn OFF power at the breaker panel and verify the wires are not live before beginning.

Installation Steps

- **Step 1: Attach the Mounting Plate**

Attach the rectangular mounting plate to the wall junction box with the two screws supplied. The two threaded posts must face outward and sit level.

- **Step 2: Wire the Fixture**

Wire the fixture body:

1. Connect black (hot) to black, white (neutral) to white, and green/bare (ground) to green/bare or the ground screw on the plate.
2. Twist connectors clockwise and tuck all splices neatly inside the box.

- **Step 3: Position the Backplate**

Place the fixture backplate onto the mounting plate, aligning it with the threaded posts, and press firmly against the wall.

- **Step 4: Secure the Backplate**

Secure the backplate by tightening the decorative cap nuts onto the threaded posts until the fixture is firmly attached to the wall.

- **Step 5: Install the Glass Shades**

Install the glass shades by carefully sliding them over the top and bottom sockets of the fixture.

- **Step 6: Tighten the Retaining Rings**

Secure the glass shades with the retaining rings, screwing them clockwise onto each socket. Hand-tighten only to avoid cracking the glass.

- **Step 7: Insert the E26 Bulbs**

Install two E26 bulbs (max 40W each, not included) by screwing them clockwise into the sockets until secure.

Final Check

Restore power at the breaker panel and test the sconce. Both bulbs should illuminate evenly and the glass shades should be secure with no wobble.
