

Freestanding Fencing System Information

A single 100' Free-Standing Cat Containment System is designed to secure a perimeter of 100 linear feet but you can construct the system to suit your needs and can use multiple kits to make your system as big as you would like.

The extremely strong yet flexible poly mesh makes climbing very difficult, but the safeguards for our cat containment systems are the Cat-Proofer™ extender arms which enable the entire upper section of the fence to pivot. The cat's weight causes these horizontal extension arms to swing downward, safely returning your pet to the ground. Once the cat's weight is released from the mesh, the spring-loaded extenders immediately return the upper section of the fence to its horizontal position.

Our system is built to last. The posts, arms, and welded wire are galvanized steel with a black powder coating and all the arm hardware and spring are stainless. All other metal components are galvanized or stainless steel and the plastic fence UV stabilized with carbon black and chemical UV inhibitors.

A single kit made into a square would be 25' x 25' (625 square feet) but most customers use the back of their house as a "side" allowing a kit to make a bigger overall enclosure and easier access for the cats. One example of a single kit enclosure off the back of a house would be 28' x 43' (so 28' out from the house - over 43' and back 28') making an enclosure that is 1,204 square feet. A two kit enclosure off the back of a house could be 65' x 65' (so 65' out from the house - over 65' and back 65') making an enclosure that is 4,225 square feet.

The system is designed to be installed by the homeowner so it is not difficult to do (site dependent). If it is something you do not want to do yourself we would recommend using a local handyman. An instructional DVD is included along with written instructions.

Tools Needed

These tools are required to install this kit

- Power Drill
- Offset or Straight Snips
- Sledge Hammer

What is Included

- Installation Video - DVD
- Written Instructions/Parts List
- (8) Posts - 80" long black powder coated 16 gauge galvanized steel
- (8) Sleeves - 24" long formed 16 gauge galvanized steel (driven into the ground to support posts)
- Driving Cap - Solid milled steel (used to drive sleeves)
- (16) Self-Tapping Screws - 10mm x 3/4" zinc self-drilling and tapping screw (secures posts to sleeves)
- Bit - 10mm driver bit (used w/ drill to install self-tapping screws)
- (8) Post Caps - Black UV stabilized molded polypropylene

- (8) Cat-Proofers Arms - black powder coated formed/welded galvanized steel, stainless steel spring and hardware
- (8) Set Screws - 5/16" x 1/2" black zinc screw, 4mm (used to secure the arms to the posts)
- 7.5' Extra Heavy Duty Fence - 7.5' x 100' extruded and bi-oriented black UV stabilized polypropylene fence - mesh 1 3/4" x 1 3/4"
- Chew Guard - 2' x 100' galvanized 16 gauge steel welded wire with a black powder coat finish - mesh 1 3/4" x 1 3/4" (lower part of fence folds on ground and is staked to secure bottom of fence)
- (200) Heavy Duty Ties - 8" x 120lb black UV stabilized zip ties (secures fence and welded wire to the posts and arms)
- (400) Light Duty Ties - 8" x 50lb black UV stabilized zip ties (seams plastic fence to chew guard)
- (60) Ground Stakes - 1/4" galvanized steel formed stakes (pins chew guard to the ground every 2')
- Free-Standing Cat Containment System - 100' total shipping weight 140lbs, ships in four packages.

Layout

Each fence layout is unique! The maximum span between posts is 14 feet. Layout, count and measure the distance between your posts/mounting points to ensure that a kit will cover your fence.

Won't Work for You?

Our system is extremely flexible and can be modified for nearly any situation or challenge.

About Purrfect Fence

Purrfect Fence is a family owned business that is the leading innovator and provider of outdoor pet containment solutions in the world. What started as a quick fix to help a friend with their escaping pet over 15 years ago has evolved into helping thousands of caring pet owners, rescues, shelters, and veterinarians safely let their pet(s) enjoy the outdoors.

As life long pet lovers, our teams mission is to continue to improve our products, expand the ways we help keep pets safe, and most importantly, enhance the quality of life for animals.

Join the thousands of owners, shelters, and animal care professionals that utilize our products with unprecedented results!

Our Commitment

We strive to offer our customers (and their humans) the best experience possible with our products. Our products install easily, are easy to maintain, and serve a distinct purpose that you and your pet can enjoy. We want to compliment your home, garden, and yard by giving your pet a safe outdoor space to explore, play and benefit from. Purrfect Fence is committed to innovative & exceptional quality products that are affordable, easy to use, and will give enjoyment time and time again to you, your pets, and your family.
