INSTALLATION:

These house numbers come with two screws at the back of the sign. All you need to do is drill two holes in the wall, apply silicone glue (or gorilla glue) to the screws also in the holes, then insert these screws in the holes. As simple as that ...

MATERIAL, WHY WE DON'T USE WOOD?

Wood is not weather resistant; Wood can also be susceptible to termites and other insects. Aluminum Composite /PVC/ACRYLIC is impact resistant and weather resistant.

NUMBERS are made of 1/4" thick (white and black numbers) or 1/8" thick (SILVER numbers) high-quality OUTDOOR acrylic which is a durable and weather-resistant material.

Back-plate is a layer of ALUMINUM COMPOSITE (metal surface) on another layer of black PVC. For White BG we use one layer of PVC white.

PLEASE DO NOT HESITATE TO ASK US IF YOU NEED MORE INFORMATION
