

INSTALLATION GUIDE

Find the sewn red label "BACK" on both sides of the sofa slipcover's back bottom, then locate the slipcover on the furniture's back, pull it down from the top to bottom.

Stretch the fabric down evenly at all sides, so that the slipcover will perfectly fit all around the furniture.

attach the loops to the legs of the furniture to keep the slipcover firmly in place (if there are no legs on the furniture, then just ignore this step, it will not affect the functions).

Adjust the slipcover to make the surface smooth enough, tuck the extra fabric into the crevices between the back and the sitting area. Congratulations, you have finished the job, enjoy this upgraded brand-new slipcover.
