

steps to care

taking care of your bath rugs

always test fabric-friendly cleaners in a small area before use.

allow rug to air-dry completely before reuse.

in case of spills, blot immediately with lint-free cloth. do not rub.

wash dark colours separately.

regular vacuuming prevents dust from settling deep into the fibres.

do not use stiff bristle brushes to clean.

do machine wash as often as required to prevent dust build-up.

do not use abrasive cleaners to prevent fading and damage.

if a yarn is loose, clip it. do not pull.

do not use heat to dry to prevent back from cracking or melting.
