

USER MANUAL

Smart Ceiling Fan Light

Welcome to the smart lighting system!

Thank you for choosing us. Are you ready to explore the world of smart lighting? Your gateway to effortlessly controlling your lighting devices from any location. Enabling you to manage multiple devices simply by touching your smartphone or tablet.

We are committed to delivering exceptional service and continuously improving our app and lighting solutions to meet and exceed your expectations. Why wait? Illuminate your surroundings with the elegance and convenience of company today. Let's brighten your space and enhance your smart living experience.

INSTALLATION AND SAFETY INSTRUCTIONS

Before performing any wiring, disconnect power completely at the circuit breaker or fuse box. Turning off the wall switch alone does not eliminate the risk of electric shock.

Installation must be performed by a qualified, licensed electrician.

Use only a securely mounted outlet box rated for fan support and capable of supporting at least 50 lb.

Install the fan so that the blade tips are at least 7 ft above the floor.

Do not reverse the fan direction while the blades are rotating. Turn the fan off and wait until the blades stop completely.

Keep body parts and loose objects away from the blades. Use only approved replacement parts.

Do not clean the blades with water or detergent. Use only a dry cloth or a lightly dampened soft cloth.

After wiring, carefully push the wires into the outlet box and keep grounded conductors separated to one side.

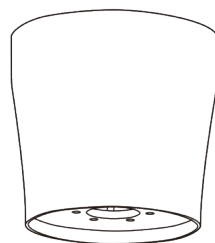

If the existing outlet box is not rated for fan support, it must be replaced.

Contact customer service if any items are missing.

Before the installation of the fan light , pay attention to the safety precautions and prepare the tools needed.

Installation tools:

Electric drill

Wrench

Ladder

Pincers

Screwdriver

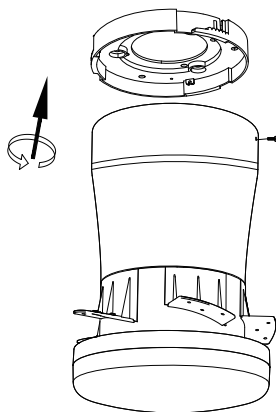

Tape

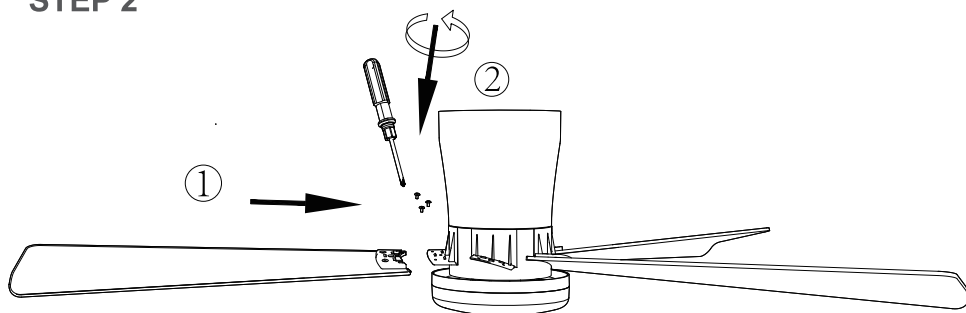

⚡ WARNING: To avoid possible electrical shock, before installing your Smart Ceiling Fan Light, disconnect the power by turning off the circuit breakers to the outlet box associated with the wall switch location.

STEP 1

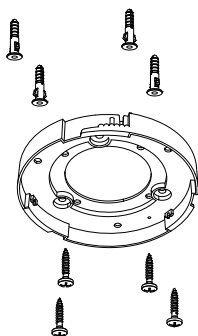

Rotate counterclockwise to remove the ceiling panel

STEP 2

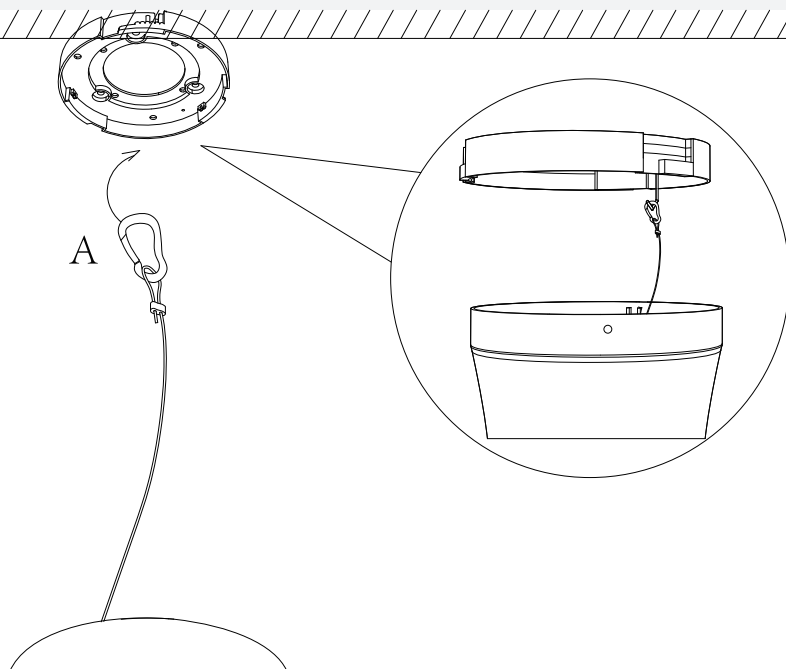

1. Slide the fan blade slot horizontally into place.
2. Use a screwdriver to tighten the three screws.

STEP 3

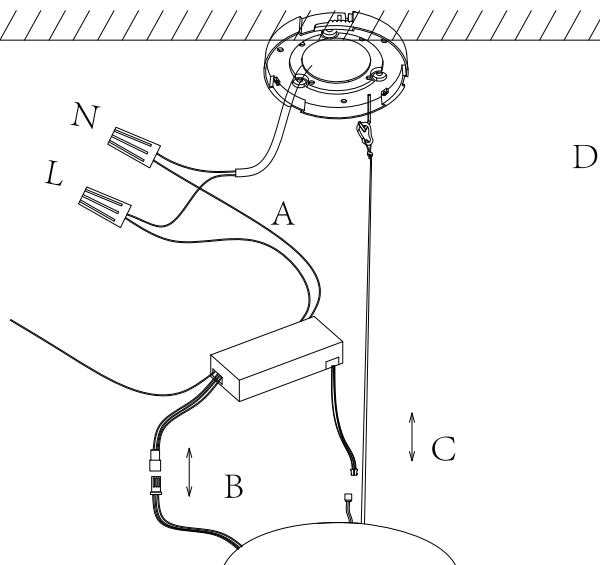

1. Install expansion screws into the ceiling.
2. Attach the mounting plate and secure it with screws.

STEP 4

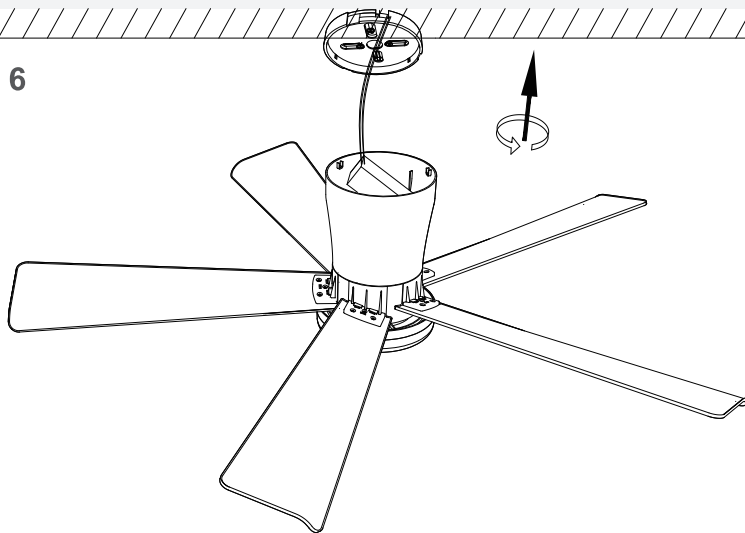

Hook the body lanyard onto the carabiner

STEP 5

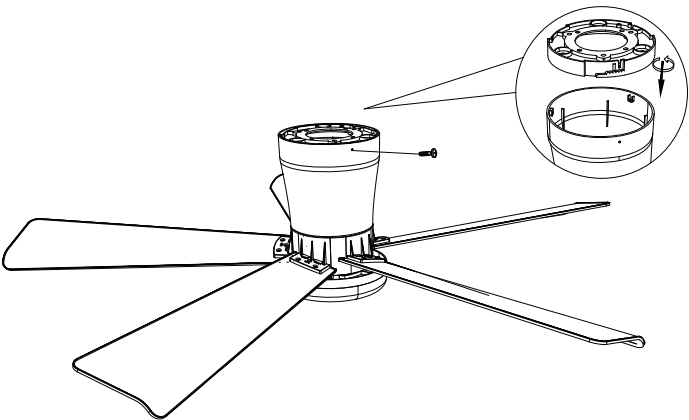

Use the nut to connect the input wires. Black wire to black wire, white wire to white wire.

STEP 6

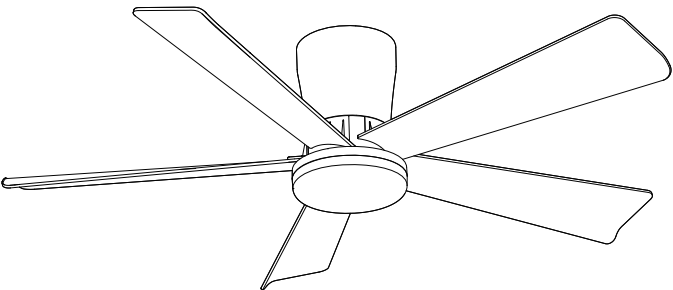

1. Place the controller into the housing.
2. Install the light fixture and give it a twist.

STEP 7

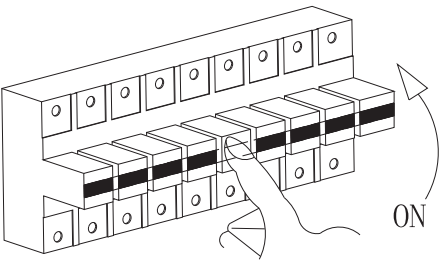

Tighten the screws.

STEP 8

Installation completed.

STEP 9

Turn on the power switch.

Install the App What You Need:

- A smartphone running iOS or Android.
- The mobile phone network is normal.
- Install the app from the App Store or Google Play.
- Make sure your smartphone is running iOS or Android and that the network connection is available.
- Turn on Bluetooth on your phone.
- Power on the fan light, open the app, and follow the in-app instructions to add the device.

Press and Hold for
Buzzer Switch**

Code pairing method

The remote control and fan light are paired at the factory, so pairing is not required before first use.

If re-pairing is needed, within 5 seconds of powering on, press and hold the light on/off key " " to pair. The light will flash or a beep will sound to indicate that pairing is complete.

 PARAMETER INFORMATION

Name	Smart Ceiling Fan Light
Model	A
Input Voltage	120VAC,60Hz
Power	Fan 35W Light 16W
Color Temperature	2700K-6500K
CRI	Ra > 80
Lumens	2000lm
Beam Angle	120°
Rated Life	25000h

Contains FCC ID:2BF9Q-YKA8

Made in China
