A

B

There are 3 brackets on your mirror and 2 screws and mollies

Decide which directions you would like to hang the mirror
Only use 2 brackets

For vertical hanging use brackets A and B

For horizontal hanging use brackets A and C

Hanging Tip:

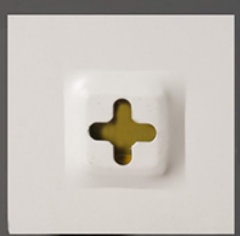
1. Place 1 piece of painters tape over the 2 brackets you are using.

2. Poke holes in the tape where the bracket cross is.

3. Then put that piece of tape on the wall where you want to hang the mirror.

4. You will be able to see exactly where to place your screws.

C



* You may see glue around the brackets or tape over the brackets. Each bracket holds up to 50 lbs and we use industrial strength glue so the mirror will hang safely on your wall. The back may not be pretty but it is extremely safe and secure.
